3. Risk profile of the investment fund

3.1. Goal of the investment fund

The primary objective of the Fund is sustainable investment, i.e. to have a positive impact on the environment. In this way, it goes beyond mitigating environmental damage and seeks to be a catalyst for environmental change. Although the Fund's key environmental objective is to mitigate climate change, it may also contribute to the achievement of its sustainability objective through other environmental or social objectives. In addition to achieving sustainable investment, the Fund also defines as its objective, to achieve capital growth through active portfolio management by investing in green bonds issued by governmental and corporate issuers in developed and emerging market countries.

The Fund Manager integrates sustainability risks and their management into the Fund's investment decision-making processes. As the Fund aims at sustainable investment, it is subject to Article 9 of the SFDR Regulation.

The Fund's credit rating limitation is that it may only purchase bonds with a credit rating recommended for investment. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. It intends to achieve this objective through an asset allocation in fundamentally green bonds available in global bond markets.

3.2. The profile of the typical investor for whom the units of the investment fund are intended

The Fund is primarily intended for Investors who plan to invest for at least the recommended minimum investment period and who consider the indicated value on a scale of 1 to 7 of the risk/reward profile to be acceptable in relation to their risk appetite.

Series	Recommended minimum investment time	Risk classification
VIG GreenBond Fund HUF-R	3 years	3 (medium-low)
VIG GreenBondt Fund EUR-R	3 years	2 (low)
VIG GreenBond Fund CZKh-R	3 years	2 (low)
VIG GreenBond Fund USD-R	3 years	3 (medium-low)
VIG GreenBond Fund EUR-I	3 years	2 (low)
VIG GreenBond Fund USD-I	3 years	3 (medium-low)

3.3. Asset categories, in which the investment fund may invest, with a specific indication as to whether the investment fund is authorized to use derivatives

The Fund holds a portfolio of foreign and domestic government securities, bonds and mortgage bonds. The Fund may enter into deposit and repo transactions, purchase collective investment securities and may also use derivatives for hedging purposes only. The risk exposure that is present in each instrument underlying the derivative transactions – also taking into account the net risk exposure in derivative transactions relating to the given instrument – may not exceed the investment limits specified for the given instrument in Government Decree 78/2014 (III.14.) on the investment and borrowing rules applicable to collective investment undertakings.

3.4. Warning regarding the section of the investment fund rules of procedure that contain the presentation of the investment fund's risk factors

The risk factors of the Investment Fund are contained in Item 26 of the Fund rules

3.5. The purpose (implementation of coverage or investment purposes) and possible effect of application of derivative transactions on the development of risk factors

The Fund uses derivatives exclusively for hedging purposes. The risk exposure that is present in each instrument underlying the derivative transactions – also taking into account the net risk exposure in derivative transactions relating to the given instrument – may not exceed the investment limits specified for the given instrument in Government Decree 78/2014 (III.14.) on the investment and borrowing rules applicable to collective investment undertakings.

Derivatives by their very nature involve much higher risks, which can be mitigated by appropriate investment techniques but cannot be completely eliminated.

3.6. If, on the basis of its investment policy, the consolidated risk exposure of the investment fund against a specific institution, which risk exposure arises from investments in transferable securities or money market instruments issued by that institution, from deposits at that institution and from unlisted derivative transactions, may exceed 20 percent of the assets of the investment fund, call attention to the special risks arising therefrom

In accordance with Section 8 (4) of Government Decree 78/2014, the consolidated risk exposure of the Fund cannot exceed 20% of the assets of the Fund. Other information related to the given topic

3.7. If the Investment Fund mainly invests in asset categories not belonging to the transferable securities or financial instruments or adapts a certain index, call attention to this element of the investment policy of the Investment Fund

Not applicable

3.8. In the event that, due to the possible composition of the portfolio or to the applicable management technique, the net asset value of the Investment Fund may strongly fluctuate, call attention to this fact

Due to changes in the economic and political environment, in the monetary policy of central banks, in the business activities of issuers and deposit-taking institutions, in the solvency of issuers and deposit-taking institutions and the perception of such solvency, and in the supply/demand relationship, the market price of the investment instruments in the Fund's portfolio may fluctuate. The impact of such price fluctuations can be reduced, but not completely eliminated, by the Fund Manager through portfolio diversification, which may result in a reduction in the Fund's net asset value per unit in certain periods.

3.9. If, based on the authorisation of the Supervisory Authority, the Investment Fund may invest even 100% of its assets in various transferable securities and money market instruments issued by an EEA Member State, its self-government, by a third country or an international organization in which one or several member states are members, call attention to this fact

Taking into account the intended proportions of each portfolio element as set out in the Management Regulations, the Fund may invest up to 100% of its assets in government securities issued or guaranteed by the EU, the OECD or G20 countries.

3.10. Other information regarding the relevant subject

Results of the assessment of the expected impact of sustainability risk on the return of the financial product offered:

(to demonstrate compliance with Article 6(1)(b) of the SFDR Regulation)

The returns of the financial products offered by the Fund Manager, including the VIG GreenBond Fund, may be affected by sustainability risks (e.g., transition to a lower carbon emission economy or a circular economy model). These impacts typically occur over a longer investment horizon, of 10 years or longer, while their results can have a significant impact on the performance of a financial product and may possibly impair its performance. (For example, the increasing importance attributed to environmental considerations may result in a market disadvantage to a company operating in a particular sector unless it switches from the ‘traditional’ way of doing things to a more modern and environmentally sustainable method within an appropriate time). Such impacts are typically reflected in the market perception of and thus also in the market value of the company over the longer term, which is something the Fund Manager takes into account in its asset selection decisions.

In the case of the VIG GreenBond Fund the inclusion of ESG considerations, as set out in the investment policy, may mitigate the impact of sustainability risks on the sensitivity of returns compared to other funds targeting a similar investment universe but not specifically adopting an ESG approach (with special regard to environmental aspects compatible with the Taxonomy).

Climate change is one of the biggest challenges of our time, but the response to it cannot be immediate and will only show results in years or decades. For this reason, spreads on some bonds – held by the Fund in the VIG GreenBond Fund portfolio – may show a premium or discount simply because the bond is classified as “green”. In addition, these green bonds may also experience lower turnover, which poses a liquidity risk. In the longer term, however, we believe that issuers and funds that pursue their activity in the framework of this objective and make investments in this approach can work around and even overcome the temporary disadvantage caused by sustainability risks, including the VIG GreenBond Fund.

4. Availability of the information provided to the investors

4.1. The name of the place where the investment fund's prospectus, rules of procedure, key investor information, reports for the purpose of regular information and announcements for the purpose of extraordinary information, including information on payments to investors, redemption of units, are available

The Fund Manager shall publish all regular and extraordinary information and announcements related to the Fund at the official Points of Publication of the Fund. Official Points of Publication of the Fund are website <https://kozzetetelek.mnb.hu> and website <https://www.vigam.hu>

The Public Prospectus prepared for the public offering of the Fund's investment units, as well as the Key Investor Information can be viewed at the distribution points and at the registered office of the Fund Manager.

4.2. Other information related to the given topic

Not applicable.

5. Tax information

This information has been compiled in accordance with the applicable legislation. The date of the last amendment of the Prospectus is – in accordance with Section 164 (1) bn) of the Kbtv. [the Hungarian act on collective investment forms] – included in the investment fund register maintained by the MNB [National Bank of Hungary], which is available on the MNB's website at <https://intezmenykereso.mnb.hu>. The current legislation may change after the Prospectus has been written; it is the Investor's responsibility to read and to be aware of the relevant regulations in force before purchasing the investment units. The Fund Manager shall not be liable for any damage caused to Investors due a lack of knowledge on their part of the applicable tax laws. Should the investors have to pay withholding tax on the returns they earn on the investment units, i.e. on price gains, due to changes in the tax regulations, the Fund Manager and the Distributor shall not be responsible for deducting such withholding tax.

Social Contribution Tax Liability

An individual is subject to a social contribution tax on the portion of interest income defined under Section 65 of Act CXVII of 1995 on Personal Income Tax, which is taken into account as the tax base for personal income tax on interest income.

The legal basis for this obligation is Section 1(5) of Act LII of 2018 on Social Contribution Tax.

Distribution outside Hungary: Please note that a detailed review of tax legislation is essential in making your investment decisions and that tax rules may differ from Hungarian rules in the case of foreign sales. In case of foreign distribution of the Fund's series of Investment Units after the Fund has been passported abroad, the tax rules of the country of distribution will apply.

5.1. A brief summary of the elements of the tax system applicable to the investment fund that are relevant to investors

The result of the Fund is not subject to tax in Hungary when preparing the Prospectus. In the case of interest, dividends, exchange gains and any other income on foreign investments, this income may be taxed in the source country (where the income is generated). Taxation of income from foreign investments is determined by the domestic legislation of the given country and, if any, the double taxation agreement between the given country and Hungary.

The Fund's investment units are subject to a special tax when preparing this Prospectus. The tax base is the average asset value of the Fund's unit series on a quarterly basis, with an annual tax rate of 0.05% of the tax base. The tax payable is determined, collected from the Fund, declared and paid by the Fund Manager.

5.2. Information on deductions at source from returns and exchange gains paid to the investors

- a) According to the legislation in force at the time of preparation of the Prospectus, the rate of interest tax payable on the yield of the Units is 15%, which is deducted by the distributor upon sale. Units can be placed in a permanent investment account, after the yield of which the distributor does not deduct tax.
- b) In the case of domestic legal entities and unincorporated companies - according to the legislation in force at the time of preparation of the Prospectus - the return of the Units may increase/decrease their taxable income, after which they must pay tax in accordance with the applicable tax legislation. At the time of preparing the Prospectus, the corporate tax rate is 9%. If, at the request of the Investor, the yield of the Units is broken down, then corporate tax is payable only on the exchange rate gain and interest component of the yield, but not on the dividend portion of the yield.
- c) Taxation of foreign individuals, legal entities and unincorporated companies: If there is an agreement on the avoidance of double taxation between Hungary and the unit-holder's own country of taxation, the taxation of income is subject to the legislation of Hungary and the legislation of his own country according to the provisions of the agreement. In the absence of an

agreement, Hungarian tax legislation is applicable to foreigners. The Distributor fulfills the tax deduction obligation in accordance with the relevant tax convention and domestic tax legislation.

II. Information related to placing to market

6. Issue of investment units

6.1. Method and Conditions for the Placement of Investment Units

The method of placing into circulation is through a subscription process.

The subscription period is from August 05, 2024, to August 07, 2024.

Place of subscription: The premises of the Fund Manager, 1085 Budapest, Baross utca 1.

The subscription is valid only if the consideration for the Investment Units applied for is credited to the Fund's custody account specified in the Notice by the closing date of the subscription at the latest.

7.13. Detailed description of the remuneration policy of the UCITS manager (e.g. method of calculating remuneration and benefits, persons responsible for determining remuneration and benefits, if any, name of the members of the remuneration committee)

At VIG Fund Management, the work of our colleagues creates value for our clients, which is why we have developed working conditions and an incentive system that allows employees who do excellent work to be retained in the long term and also attracts new talent. This requires a competitive remuneration system in addition to work-friendly conditions and ongoing training.

Our remuneration philosophy is based on monitoring the labor market and developing appropriate references. Part of our philosophy is to ensure that employees who meet expectations are adequately remunerated. To this end, in addition to a fixed income, we use variable pay in certain jobs, primarily in the area of asset management and sales.

At the same time, our remuneration policy only supports healthy risk-taking, thus preventing our colleagues from taking excessive risks that go beyond the mandate. The considered risks also include the sustainability risks, this way supporting the holding's vision that responsible investment practice may create value on the long run. To this end, we make risk indicators part of the interest system, among others, we also use longer-term performance data in the evaluation, and in the case of colleagues with a decisive role in risk-taking (so-called identified), we pay 50% of the variable remuneration, with a three year deferral. Who. This allows the reward to be reduced or withdrawn in the event of excessive risk taking after the end of the assessment period. Over the three years, the accrued portion will be invested in key investment funds managed by VIG Fund Manager, strengthening the interest in the good performance of the funds. A designated group of employees may also receive an annual variable salary (bonus) depending on performance.

Employees involved in the bonus: members of the Board of Directors, fund managers and analysts, senior colleagues in the sales area, and the head of the finance 14 and settlement area. The Fund Manager intends to reward excellent performance for the employees involved in this area on personalized terms. Based on the classification of employees working in the above areas, the maximum bonus that can be paid can reach 100 percent of annual income in the case of excellent performance. Maximum performance is achieved when all set goals are exceeded. The setting of personalized goals is the responsibility of the line manager, while its approval is the responsibility of the Chairman and Chief Executive Officer, excluding the job descriptions of the members of the Board of Directors and the identified employees. In their case, the objectives are set under the supervision of Risk Management, while their approval is the responsibility of the Chairman of the Supervisory Board.

The fulfillment of the objectives will be assessed, monitored and approved in accordance with the above. In determining the amounts that can be paid out as a bonus, in addition to achieving the individual goals, the size of the bonus frame calculated and approved by the remuneration committee of the VIG Group appears as an additional consideration.

VIG Asset Management Co. has developed and continuously maintains its remuneration policy in such a way that it complies with the sectoral legal requirements governing fund managers and other regulatory requirements, in particular the NBH's recommendation on financial institutions' remuneration policy. In addition to the above, the Fund Manager always takes into account the remuneration principles of the Group during the development of its remuneration rules. The remuneration policy is approved by the Supervisory Board and is implemented by the Board of Directors, which is audited annually by internal audit

7.14. Summary of the remuneration policy of the ÁÉKBV fund manager

For our investors the work of employees of the Fund Management Company creates a value, therefore we developed such working conditions and incentive system by which employees performing excellent work can be maintained for the long run. The monitoring of the labour market and the development of adequate references provides the basis for the Remuneration philosophy of the Fund Management Company. It is also part of our philosophy that employees performing above the expectations should get an adequate remuneration; for this purpose, we apply a variable payment in addition to the fixed income, with special regard to the Asset Management and Sales Departments

7.15. A statement by the UCITS management company that the detailed description of the remuneration policy indicated in Section 7.13. is available through a website (including a link to the website) and is also available in hard copy on request.
