

VIG Central European Equity Fund

PLN-IP series MONTHLY report - 2026 APRIL (made on: 04/30/2026)
PLN

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to invest on the stock market of the Central and Eastern European Region. It is for investors who would like a share in the long-term performance of listed companies in the region. In the development of the portfolio of this Fund, the priority is to optimise the aggregate risk of the securities added to the Fund. In order to reduce risks, the Fund Manager exercises the highest degree of diligence when selecting the securities to be included in the portfolio. It analyses the risk factors of the securities, and supports its decisions with in-depth calculations.

The Fund purchases stocks issued by companies in Central and Eastern European region (primarily Hungary, the Czech Republic, Poland, Austria, Romania, secondarily Slovenia, Croatia, Slovakia), but it may also invest in the stocks of other developing and developed foreign companies as well as other collective investment securities. Due to the strategy of the Fund, it may also invest in assets denominated in foreign currency. The Fund may hedge some or all of its foreign currency risk using forward currency positions against the target currency. The Fund Manager has the discretionary right to reduce the foreign currency risk of the currency positions differing from the Fund's target currency, based on the market processes by concluding hedge transactions. In addition, the use of equity and index futures is permitted in order to effectively build the Fund's portfolio. To ensure liquidity, the Fund wishes to add government securities issued by member states of the EU, OECD, or G20 to its portfolio.

MARKET SUMMARY

April was overshadowed by the blockade of the Strait of Hormuz: the leading index of the New York Stock Exchange, the S&P 500, started the month at the yearly low, then rose to a record high on news of a US-Iran ceasefire, then faltered as peace talks stalled. The index finally closed up at the end of the month, but the rise remained concentrated: technology and AI held the market, while the energy sector lost its war premium. Although the VIX (volatility index) decreased, the sustainability of the bull market is questioned by the fact that the rally took place in a narrow range of stocks, while "breadth indicators" that compare the number of rising and falling stocks deteriorated. The Fed, which plays the role of the central bank, refrained from changing interest rates in April, but the market gradually revised its easing expectations during the month, as the oil price shock projects permanently higher inflation. Eurozone inflation rose to 2.5% in March, driven by the energy price shock. The European Central Bank kept its key interest rate unchanged in April, contrary to expectations, as policymakers are waiting for the war effects to fade before easing. EU core inflation stood at 2.4% at the end of March, but the gradual impact of the energy shock is expected to be reflected in Q2 data.

Following the correction in March, Central European regional markets performed better in April, although the extent of the rise was significantly smaller than in the U.S. or Asian markets. In local currency terms, the Czech and Romanian markets performed the weakest, while the Polish market was relatively strong. The Hungarian market, however, delivered the best performance, where the parliamentary elections had a positive impact on both stocks and the forint. Due to country-specific news, relative movements within sectors were very significant, with OTP driving the banking sector, Magyar Telekom the communications sector, and Mol the oil sector. The Sub-Fund's performance was roughly in line with the benchmark index's return; among active positions, AT&S and CD Projekt contributed most positively, while Erste and Digi contributed negatively to the relative return. The Sub-Fund increased its exposure in several stocks over the past month, resulting in a return to an overweight position in equities by the end of the month. Within this, the weightings of Polish and Hungarian stocks increased the most.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% CETOP 5/10/40 Index
ISIN code:	HU0000728183
