

INVESTMENT POLICY OF THE FUND

The objective of the investment fund is to make the Polish bond market accessible to the investors, and to function as a relatively stable, medium-risk investment form bringing steady real yields to our Clients on middle term already, without having to tie down their money for a fixed period of time. The Fund mainly invests in Polish government securities issued in zloty, however, the portfolio manager has some room to complement the portfolio with other bond-type investments. Our goal is to achieve the highest yield while taking the lowest risk. To make investment decisions we use the tools of both fundamental and technical analysis, and we take into consideration the investor sentiment on the markets at all times. The portfolio manager seeks out potential investment opportunities based on the macro-economical expectations, the expected yield curve, the return expected on the curve and the market volatility, and selects investments that are considered to be safe and bring relatively high yields in exchange for the risks taken. The Fund strives for complete exchange risk coverage of foreign currency exposure for the target currency.

MARKET SUMMARY

The performance of bond markets continued to be shaped by the Iranian conflict that broke out at the end of February and has been ongoing ever since. Rising global oil prices have intensified inflation concerns, leading to an increase in bond yields. In April, Polish bond yields continued to rise. Compared to the beginning of the month, yields increased by 13 basis points at the three-year maturity, 27 basis points at the five-year maturity, and 3 basis points at the ten-year maturity. The market is currently pricing in two rate hikes for 2026. At its rate-setting meeting in early April, the Polish central bank left the policy rate unchanged at 3.75%. Central bank governor Glapiński remains convinced that the current energy crisis differs from the one four years ago, as commodity prices have not risen nearly as sharply as in 2022, and domestic consumption is also weaker. However, in his statement, he continued to urge caution. According to preliminary data, inflation rose from 3.0% to 3.2% in April, mainly driven by increasing household energy prices, while the rise in food prices continued to slow. Industrial production grew by 9.4% in March 2026, and retail sales were also strong, posting a year-on-year increase of 8.7%. Due to the geopolitical situation, uncertainty remains high, and the outcome of the war is still unclear.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% TBSP Index
