INVESTMENT POLICY OF THE FUND

MARKET SUMMARY

The performance of bond markets continued to be shaped by the Iranian conflict that broke out at the end of February and has been ongoing ever since. Donald Trump's statements aimed at ending the war repeatedly put downward pressure on oil prices during the month. However, a lasting peace between the two parties has not yet been achieved. As a result, Swiss government bond yields were also volatile throughout the month. By the end of the month, however, both one-year and three-year yields had declined by 7 basis points. The next monetary policy meeting in Switzerland is scheduled for mid-June. In our view, however, a change in the policy rate is unlikely. Market pricing currently does not imply either a rate cut or a rate hike this year, although one rate hike is currently priced in by March 2027. The Swiss franc continued to appreciate against the euro in May amid ongoing geopolitical uncertainty. However, in early June, Swiss National Bank Governor Martin Schlegel once again indicated that the central bank is prepared to intervene in the foreign exchange market to prevent excessive appreciation of the franc. According to the fresh data, inflation have arrived below market expectations, the year-on-year data was 0,6% in May. Economic activity also improved somewhat during the month, as the economic barometer published by the KOF Swiss Economic Institute rose to 98 points. Geopolitical uncertainty remains elevated, and the outcome of the war is still far from clear.
