

VIG SMART MONEY FUND OF FUNDS

A series HUF

MONTHLY report - 2026 JUNE (made on: 06/30/2026)

INVESTMENT POLICY OF THE FUND

The Fund's objective is to establish a portfolio for its Investors that generates positive returns - higher than the yields available on the domestic money market - under all circumstances, i.e. the Fund pursues a "total return" strategy. The Fund seeks to achieve this goal by selecting, through various analytical techniques, the asset classes and investment funds that have the greatest price growth potential and make investments through the purchase of investment units and collective investment securities. The Fund invests primarily in investment funds managed by VIG Befektetési Alapkezelő Magyarország Zrt., but may also purchase other investment funds and collective investment securities in its portfolio for diversification purposes or if the given asset class is not yet covered by the Fund Manager's funds. In order to ensure liquidity, the Fund may hold in its portfolio discount treasury bills and government bonds issued by the Government Debt Management Agency (ÁKK), interest-bearing securities guaranteed by the Hungarian State, and bonds issued by the MNB. As the range of possible investments includes investments denominated in foreign currency, ETFs and investment units, the Fund's investors may also bear some foreign exchange risk. According to the Fund's investment policy, it invests or may invest more than 80 percent of its assets in investment units or other securities issued by a collective investment undertaking. However, the Fund does not intend to hold more than 20% weight in any one investment fund, except for the VIG Hungarian Money Market Fund, VIG Hungarian Bond Fund, VIG MoneyMaxx Emerging Market Total Return Fund, VIG Alfa Absolute Investment Fund, VIG Bondmaxx Total Return Bond Fund, VIG Maraton ESG Multi Asset Fund, VIG Panoráma Total Return Fund and VIG Ózon Annual Capital Protected Fund, the weight of which may be as much as 100% within the Fund's portfolio.

MARKET SUMMARY

The Fund's price rose again in June. Trading in June continued to focus on the same themes as before: news related to Iran and the Strait of Hormuz, oil price volatility, the earnings reports of artificial intelligence (AI) chip manufacturers, and shifting expectations regarding interest rate hikes following the appointment of the new Fed Chair, Kevin Warsh. U.S. macroeconomic data released mid-month—including strong labor market statistics and higher-than-expected inflation figures—combined with the Fed's hawkish statement, significantly increased the likelihood of interest rate hikes, which in turn heightened volatility in the stock markets. SpaceX's IPO further fueled market euphoria. Toward the end of the month, volatility in the AI and semiconductor sectors weighed on the Nasdaq, but easing concerns about the oil market helped stocks close the quarter on a strong note. In June, among our absolute return funds, the Alfa and Maraton Funds—which hold Hungarian government securities and have forint exposure—performed well, thanks to the positive capital market reaction to the TISZA party's election victory. In tandem with the correction in crude oil prices, the Panoráma Fund which maintains an allocation to commodity markets—posted a slight negative return for the month. The forint's continued appreciation was not favorable for the forint-denominated performance of our smart-beta strategies with foreign currency exposure, while performance in the fund's base currency was in line with expectations.
