

INVESTMENT POLICY OF THE FUND

MARKET SUMMARY

On the international equity markets in June, investor sentiment was shaped primarily by the performance of the technology sector and corporate news related to artificial intelligence. In addition, easing geopolitical tensions and falling oil prices also had a significant impact on stock returns. Although international stock markets posted negative returns in dollar terms during the month, the strengthening of the dollar meant that they actually showed positive performance in forint terms. Moreover, the Central European region proved to be an outperformer: the CETOP index posted a 3.38% return in forint terms. This growth was driven primarily by the Romanian, Austrian, and Hungarian markets, while the Czech and Polish stock exchanges lagged behind. OTP was the main driver of the BUX index's 3.92% gain, with a performance of over 10%, while MBH Bank and Zwack Unicum also posted moderate, single-digit growth. In contrast, the shares of 4iG, Richter, and Alteo suffered the largest declines on the domestic market during the month.
