

VIG DEVELOPED MARKETS GOVERNMENT BOND INVESTMENT FUND

I series HUF

MONTHLY report - 2026 AUGUST (made on: 08/31/2026)

INVESTMENT POLICY OF THE FUND

The objective of the Fund is to create a highly defensive investment portfolio for its Investors, which typically invests in developed-market government bonds and related exchange-traded derivatives. According to the intentions of the Fund Manager, the bulk of the Fund's portfolio is made up of bonds issued by foreign states and foreign companies through public offerings. With regard to foreign securities, the Fund only purchases publicly traded securities listed on a foreign stock exchange. It keeps the planned share of non-investment grade securities low. The proportion of bonds that can be held in the Fund at any given time may reach the prevailing legal maximum. In order to ensure liquidity, the Fund may purchase Hungarian government securities (primarily discount treasury bills) and MNB bonds. The Fund Manager has the option, at its own discretion, of hedging all or part of its foreign exchange risks using forward currency positions subject to observing the applicable legal requirements.

MARKET SUMMARY

The Fund closed the month with a 0.21% increase in HUF terms in July. The appreciation was driven primarily by the stronger performance of foreign currency-denominated assets following the weakening of the HUF, while global bond yields rose in July due to the unresolved conflict in Iran and persistently high oil prices.

In terms of the Fund's composition, we sold the Serbian euro-denominated government bonds held in the Fund and replaced them with a newly issued Serbian euro-denominated government bond offering a higher yield spread. Furthermore, taking advantage of the rise in global yields, we increased the Fund's interest rate exposure to USD- and GBP-denominated assets.
