

# VIG DEVELOPED MARKET GOVERNMENT BOND INVESTMENT FUND

I series HUF

MONTHLY report - 2026 SEPTEMBER (made on: 09/30/2026)

## INVESTMENT POLICY OF THE FUND

### MARKET SUMMARY

The main event of the month was the Federal Reserve's interest rate increase: the US central bank raised its benchmark rate by 25 basis points, as expected. This is the first rate hike since July 2023, and market participants expect it to be followed by a further 3–4 rate hikes. Rising U.S. yields are being driven by a combination of factors, including the substantial U.S. budget deficit, inflationary pressures, and bond issuances linked to AI investments. Despite this, there has been no overall downturn in the U.S. stock market yet, but beneath the surface, the picture is no longer uniform. While AI-related equities are performing well, stocks of companies operating in more traditional sectors of the economy are underperforming. This is clearly illustrated by the underperformance of the Russell 2000 Index, which tracks the average price changes of small-cap stocks. Corporate earnings and earnings expectations remain strong, but it is unclear how vulnerable these outlooks would be if the development and adoption of AI were to slow down due to regulatory or other factors.

Monetary policy is also tightening in Europe. Alongside improving growth prospects, rising inflation expectations driven primarily by high energy prices are a particular concern. The bond market is characterised by soaring yields. In Western Europe, high yield levels are being driven by domestic political instability, rising inflationary pressures and the ongoing Russia-Ukraine conflict. The automotive industry, a key driver of European manufacturing, is under pressure to undergo structural change due to competition from China.

Global yield levels rose significantly in September - which implies a drop in prices for the bond market - causing the Fund's performance to decline by nearly 1.1% over the past month. Energy prices remain high, and it is possible that no progress will be made toward resolving the Iran conflict before the US midterm elections in November.

Regarding the Fund's composition, we participated in Erste Bank Hungary's issuance of 6-year euro-denominated bonds and purchased short-term US Treasury bills using available cash reserves. The Fund's positioning is moderately positive following the recent significant rise in yields.
