VIG GREENBOND FUND

HUF-R series HUF MONTHLY report - 2026 OCTOBER (made on: 10/31/2026)

INVESTMENT POLICY OF THE FUND

The Fund's goal is to achieve capital growth through active portfolio management by investing in green bonds issued by governments and corporations in developed and emerging markets, while also advancing the Fund's sustainability objectives. The Fund Manager integrates sustainability risks and their management into the Fund's investment decision-making process. The Fund aims to promote environmental and/or social characteristics and pursues sustainable investment, thereby falling under Article 9 of the SFDRregulation. The Fund's credit rating restriction is that it may only purchase bonds with an investment-grade rating. With a reasonable risk approach, the Fund seeks the highest possible capital growth, primarily through asset allocation in green bonds available in global bond markets. The Fund's investment strategy is built on ustainable value creation, aiming to develop an actively managed, well-diversified portfolio that considers both sustainability criteria and the fundamentals of its assets. To achieve this, it primarily invests in developed market reen corporate and government bonds issued in foreign currencies, and may also hold emerging market green corporate and government bonds. The bond portfolio may also include short- and long-term, fixed or variable rate bonds issued by mortgage banks, other financial institutions, municipalities, or other economic organizations.The Fund's goal is sustainable investment, which it plans to achieve primarily, though not exclusively, through a positive environmental impact within the ESG universe. In pursuit of this, it mainly intends to invest in bonds from countries with low greenhouse gas emission intensity, a strong exercise of civil liberties, and low rates of social violations. Additionally, the Fund plans to invest in bonds of companies with a low ecological footprint, contributing through their activities to solving global environmental issues, such as the transition to a low-carbon economy or a circular economic model. The Fund may hold assets with exposures differing from the base currency up to 100%. The Fund Manager generally hedges currency exposures to the target currency (EUR)at 100%, but may also hold open currency positions depending on market expectations. The Fund invests at least 80% in assets issued and traded outside Hungary.

MARKET SUMMARY

In October, three mutually reinforcing forces shaped the money and capital markets: doubts about the finance ability of the investment cycle linked to artificial intelligence, persistently high real yields, and oil prices above $110 due to the escalation in the Middle East. At its October meeting, the Federal Reserve kept its benchmark interest rates unchanged, even though an interest rate hike had been priced in just a month earlier. The 10-year yield fell from a peak of 5.3% to below 5%. This was not driven by disinflation, but rather by expectations of a slowdown in AI-related bond issuance. Although the S&P 500 hit a new high early in the month, this was followed by the longest losing streak for semiconductor stocks since 2008. The main risk remains the November 3 midterm elections and the subsequent likelihood of a U.S. military strike against Iran. In Europe, inflation has remained above 3%, shifting the balance within the European Central Bank toward further tightening. The French yield spread widened to more than 170 basis points, and the 10-year yield temporarily exceeded 5%. The auto and luxury sectors were dragged down by weak Chinese demand, while AI-related electric vehicle stocks were weighed down by global market sentiment.
The Fund’s unit price rose by 0.7% in October, as yields in the Eurozone began to decline from their previous peaks. Following a rate hike in September, the European Central Bank kept its key interest rate unchanged in October, while inflation in the Eurozone accelerated to 3.8% in September. Tensions remained high in the French bond market due to the fiscal situation, with the yield spread between 10-year French and German bonds hovering around 150 basis points. The Fund’s positioning is moderately positive following the significant rise in yields seen recently.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
