INVESTMENT POLICY OF THE FUND

We launched the AEGON Asia Equity Fund of Funds so that our customers could profit from the Asian growth. The persistent profit growth of Asian companies, the regions richness in liquidity and the appreciation of the Asian currencies are the key to the strong economic growth of the region, a growth that will probably be much higher in the years to come than the European or American one. According to our opinion the long-term structural development secures the sustainable above-average growth. Dissimilar to the previous economic cycles, the region is less vulnerable because of its big foreign-exchange holdings and low indebtedness. The developing internal demand and high liquidity could compensate a potential slowdown in the American economy. Most of the Asian equities offer high dividend yields and the valuation level of the companies is low compared with other regions. Certainly it is important to invest in such markets that have adequate valuation levels. Our investment decisions are supported by a special investment-planning model, which builds on all the important macro economical indicators and the companies' evaluation indicators. 75% MSCI AC Far East ex Japan + 15% MSCI India + 10% ZMAX Index is the composite benchmark index of the Fund. The Fund's main goal is to overperform its benchmark by a minimum of 2%.

Liabilities	0.26%
Receivable	0.45%
Total investment assets	100.00%
Net corrected leverage	91.94%
Derivative products	0.87%

MARKET SUMMARY

Asian (ex-Japan) equities slightly outperformed, falling 2.2% while developed market equities dropped 2.35% in November as risk aversion reemerged. The Fed's QE2 announcement buoyed markets at the beginning of the month, but policy tightening in China and an escalating debt crisis in Europe dragged equities lower. EM macro drivers were mixed, with surging commodity prices offset by a stronger USD and wider spreads on heightened debt concerns: Oil rose 3.3%, commodities were up 0.25%, the USD rose 5.2% and EMBI spreads widened 21bp. We keep our neutral position in the fund, which may be increased a bit toward year-end in order to benefit from a possible rally which might be supported by strong leading indicators.

NET YIELD PERFORMANCE OF THE FUND:

Time horizon	12 months*	2009 year	2008
Net return of the Fund ^a HUF	36,30%	26,50%	-34,82%
