INVESTMENT POLICY OF THE FUND

The AEGON Hungary Fund Management Co. created Hungary's first EUR denominated total return fund, the AEGON EuroExpress Fund. The fund acts as "long-only", so it can only take long positions. It is not allowed to take uncovered short positions to profit from the dropping prices. We launched this fund because a lot of our clients said that they don't feel experienced enough in the field of investment, so it is difficult for them to decide in which fund they should invest. The constantly changing market situation causes a big dilemma for the investors, bringing to mind questions of when and how they should re-allocate their portfolio. The AEGON EuroExpress Fund resolves these questions and it takes the responsibility for making the right investment decision for private investors, who can handle low/moderate risk and who are not too risk-averse. According to the opinion of the fund manager, our Fund is allowed to invest in any type of Hungarian/International bond or equity as well as in Hungarian/International currencies. The fund manager's financial leeway is very wide, even while paying maximal attention to legal compliance. The aim of the fund is to provide its investors with a good yield at low/moderate volatility. In other words, the Fund targets a high Sharpe-ratio. The Fund's benchmark is the base rate of the ECB (European Central Bank) which is effective on the first trading day of the year. The fund manager is allowed to hedge the foreign exchange risk entirely or partly by using currency futures. The Fund offers an excellent opportunity for investors who wish to invest on a euro basis, and would like to achieve much higher returns than the euro denominated bank deposits can offer, while the level of risk is moderately low.

Liabilities	3.94%
Receivables	2.95%
Total investment assets	100.00%
Net corrected leverage	31.31%
Derivative products	13.31%

MARKET SUMMARY

The year started well for risky assets, encouraging estimates about global growth and the easing of Euro zone sovereign fears all supported the price action. Investor optimism looks unbroken so we increased risk in the fund during January. We switched short tenor safe government securities to higher risk (but still short tenor) sovereigns and Hungarian corporate bonds. With the latter we aim to catch the sentiment turnaround regarding local assets. We stopped out our long tenor Slovakian government bond, which performed on a spread basis but rising core yields weighed on the performance. Equity markets continued their liquidity and corporate earnings driven upward trend in January. The political crisis in Egypt brought in some jitters for equities, which turned out to be short-lived. Brent crude surged past the key level of USD 100/bbl for the first time in 2 years, which supported our Russian E&P positions. Investors seeking for a place to hide in a potential correction preferred defensive telcos and utilities in January which contributed to the fund's overall performance.
