Government paper repo	1.77%
Current account	0.00%
Other assets	7.71%
Total investment assets	100.00%
Net corrected leverage	9.84%
Derivative products	0.00%

## Market Summary:

A calm atmosphere characterized the money markets in May, and the lower yields (within one year) got stabilized around the level of 9.30% in the last month. The Fund did not take risky positions, because we do not see scope for further rate-cuts and the European Parliamentary Elections pose substantial political risk. We do not see chance of further monetary policy easing till the end of the year, that is why aggressive position takings are not backed.

## Investment Policy of the Fund:

The AEGON Money Market Fund is a very useful investment possibility, which substitutes the classic time deposits. These funds worldwide offer their investors numerous advantages. Money market funds are very liquid, meaning investors can take money out of them on short notice. There is no penalty for taking money out of your money market fund, unlike time deposits. These funds offer competitive and stable yields at a very low risk. According to this the fund is only allowed to hold very safe investments like t-bills and Hungarian government bonds which duration is lower than one year. Government debt securities are considered very safe because the government has the ability to raise taxes to meet its obligations. The portfolio manager always follows the all-time liquidity and gilt-edged market trends. Since the average duration of the fund is lower than one year, the volatility of the fund is also very low, much lower than the volatility of a bond fund, which can contain longer government bonds as well. The gross yield of the Fund should reflect the yield of the short-term government securities and the yield of the t-bills. We recommend the fund for those investors whose investment horizon is shorter than one year and/or who wants to run very low risk only. The Fund is also recommended for those who seek higher returns than the rates of the time deposits, but need quick access to their savings. It is ideal to hold the money between investments, or for investors who are looking for a so-called safe havens in case of market panics.
