AEGON Magyarország Befektetési Jegy Forgalmazó Zrt.

BNP Paribas Magyarországi Fióktelepe

ERSTE Befektetési Zrt.

Raiffeisen Bank Zrt.

## INVESTMENT POLICY OF THE FUND

The Fund's objective is to establish an investment portfolio with a "total return" perspective – to achieve positive return for the investor under any circumstances. The Fund attempts to reach this goal by selecting – subsequent to the application of different ways of analysis – those asset classes that bear the highest potential for appreciation. Investments are performed through the purchase of investment Fund's units and collective investment securities. According to the professional consensus, 40 percent of the return of a given portfolio is determined by the selection of the asset classes. With regard to this, one of the most important steps in carrying out investment activity is the selection of the appropriate asset class, which requires increased awareness, market experience and deeper analysis, forecasting capability, and last but not least an immense amount of time. These capabilities and resources can be found, naturally, among professional investors, and consequently it is them who make and carry out those decisions that result in the highest profit with the most advantageous risk/reward ratio. To achieve a continuously positive return the Fund actively uses risk management procedures, primarily so-called "stop-loss" procedures. Further, the sizes of positions that bear higher risk are selected with the utmost care. With the help of AEGON derivative Funds the AEGON Smart Money Investment Fund of Funds will have the opportunity of "short-selling" and thereby the ability to

realize positive returns not only in rising markets, but in falling ones as well. The Fund primarily invests its capital into the investment funds, managed by AEGON Hungary Fund Management Co., but it is also allowed to invest into other investment funds, or purchase collective securities for its portfolio with the objective of diversification, or if the given asset class should not be covered by the Funds of the Fund Management Co. Indirectly, the Fund is able to reach the total investment universe known today, through the units of the investment funds (bond market, money market, stock market, real estate market, private equity, derivatives and other regulated and OTC derivative products, commodity market products, currency, etc.) and realize investments on the domestic and international level as well. To assure liquidity, the Fund can hold government bonds and treasury bills issued in the name of the Hungarian State by the Hungarian Government Debt Management Agency and distributed within the framework of the PDS – the Primary System for Distribution of Government Securities – as well as bonds issued by the National Bank of Hungary (Central Bank) and other money market instruments in its portfolio.

The Fund thus takes some heavy weight off the investor's shoulders, namely: the asset allocation between asset classes, and switching to the appropriate Fund. The Fund has no benchmark index, but wishes to achieve a positive return under any market circumstances.

## MARKET SUMMARY

“Global equity markets bounced back in April on the back of the strong Q1 earnings season. 2/3 of the reporting companies beat on EPS, highest surprise came from the global cyclicals (thanks to strong commodity prices). On the other hand global leading indicators shows some deterioration in developed markets (US ISM manufacturing index declined to a four-month low of 60.4 in April), which may indicate some slow down of the earnings growth trend. Despite the strong commodity prices, emerging markets underperformed developed markets in April on renewed inflation and interest rate concerns. In the middle of the month, we decided to cut back our Chinese exposure, while we maintained our CEE equity proportion. Among the fixed income funds, we decided to sell some regional sovereign exposure after the strong rally YTD – especially in Hungary – and we purchased regional credit funds. At the same time we raised our non-domestic currency weight.

## NET YIELD PERFORMANCE OF THE FUND:

Time horizon	12 months*	2010 year
Net return of the Fund*	2,55%	6,24%

\* It shows the net performance of the fund until 30/04/11  
The Fund was launched on 15/09/09
