Start:	2002.09.25
Currency:	HUF
Total Net Asset Value of the Fund:	9,072,062,488 HUF
Net Asset Value per unit:	1.969666 HUF

INVESTMENT POLICY OF THE FUND:

The AEGON Money Market Fund is a very useful investment possibility, which substitutes the classic time deposits. These funds worldwide offer their investors numerous advantages. Money market funds are very liquid, meaning investors can take money out of them on short notice. There is no penalty for taking money out of your money market fund, unlike time deposits. These funds offer competitive and stable yields at a very low risk. According to this, the fund is only allowed to hold very safe investments, like T-bills and Hungarian government bonds with durations lower than one year. Government debt securities are considered very safe because the government has the ability to raise taxes to meet its obligations. The portfolio manager always follows the all-time liquidity and gilt-edged market trends. Since the average duration of the fund is lower than one year, the volatility of the fund is also very low. It is much lower than the volatility of a bond fund, which can contain longer government bonds. The gross yield of the Fund should reflect the yield of the short-term government securities and the yield of the t-bills. We recommend the fund for those investors whose investment horizon is shorter than one year and/or want to run very low risk only. The Fund is also recommended for those who seek higher returns than the rates of the time deposits, but need quick access to their savings. It is ideal to hold the money inbetween investments or for investors who are looking for a so-called "safe haven" in case of market panics.

MARKET SUMMARY:

Local money markets were characterised by low volatility in March. Short yields were quite stable, EURHUF traded in a tight range. IMF/EU negotiations did not start yet, which does not help sentiment, but the market remained patient, we did not experience any significant weakness. A rate cut looks improbable before an IMF agreement is signed and there is no reason to hike either, although there was a surprise vote for a hike on the March MPC meeting (vote for a cut remained unchanged). Reason for this can be the slightly weaker global sentiment amid weaker PMI data and the corresponding move wider in the local CDS (not irrespective of postponed IMF/EU talks). The fund beat the benchmark by 3 bps, mainly due to good performance of off-benchmark positions.

ASSET ALLOCATION OF THE FUND ON 03/31/2012
