Net Asset Value of institutional series:	2,092,642,541 HUF
Net Asset Value per unit:	2.001341 HUF

INVESTMENT POLICY OF THE FUND:

The AEGON Russia Equity Fund primarily targets the stock exchange-traded shares of companies that maintain an active presence in Russia or the other CIS states, or which generate a substantial proportion of their revenues in these countries. The Fund predominantly invests in equities, but its portfolio also contains bonds and discount treasury bills, currencies and money-market products, to ensure the Fund's liquidity. The equity investments are usually denominated in foreign currency; however the fund may hedge some or all of the currency risk arising from these liabilities by concluding forward or option transactions. Although the Russian and CIS market promises a high potential return, the value of investments may display a marked degree of fluctuation in the short term, and therefore it is advisable to treat the Fund as a long-term investment. The Fund Management primarily bases its investment decisions on its own fundamental analyses, but it also makes use of the information and analyses provided by other investment service providers, banks and independent research companies, in the interests of reducing risks and maximising returns. The Fund's benchmark: 95% RDX Extended Index USD + 5% ZMAX Index.

MARKET SUMMARY:

In August, after the initial rise, the markets stagnated close to the peaks of March. The global macro picture shows a slowdown henceforward. The expectations concerning the introduction of the next QE as well as the bond-buying program intensified in August. At the end of the month Ben Bernanke emphasized the necessity of the QE, but he did not mention any specific measures, in spite of this the markets reacted positively. The price of precious metal rose during the month. Due to the unsolved exploitation at the North Sea, we saw a sharp Brent oil price correction, however the raw materials linked equities did not follow it. The MSCI Russia index closed the month by 0.7% higher after the end of July. Russia's Performance in Index was in line with the MSCI Emerging Market Index as well as its BRIC peers. On 22 August Russia joined the WTO. According to World Bank estimates by 2020, joining the WTO could boost Russia's GDP 11% higher than it would be without membership. Although the short term effects of the accession are limited, in medium and long term it can be regarded as very positive.

ASSET ALLOCATION OF THE FUND ON 08/31/2012

Asset type	Weight
International equities	94.40 %
Current account	4.28 %
