## INVESTMENT POLICY OF THE FUND:

Goal of the fund is to achieve higher return on EUR denominated savings than bank deposits. The fund has a broad money market mandate that mixes the EM expertise of the fund manager with the safety of traditional money market funds. The fund invests the bulk of its assets on fixed income markets and is not allowed to buy equities. Short term EUR denominated sovereign and corporate bonds represent the investment focus of the fund. The fund manager keeps total duration of the fund low to achieve low volatility, it can not be higher than one year. The fund purchases standard money market instruments but also exploits opportunities on the corporate and covered bond markets to achieve excess return. Quality is paramount: non-investment grade issues are exempt from the investment universe. This is a long-only fund with no leverage allowed.

## MARKET SUMMARY:

After the optimism experienced at the start of the year, rising US long rates puzzled markets. Cross asset correlations decreased, performances were weaker. EM bond fund returns (mainly hard currency) also suffered from higher core rates, no wonder fund flows got smaller immediately. During the month market sentiment deteriorated further amid weaker macro data and the outcome of the Italian elections. Although euro short yields increased somewhat from end of January, this move was undone by the end of February. Cash holdings remain high.
