Net Asset Value of HUF series:	11,465,424,355 HUF
Net Asset Value per unit:	2.109805 HUF

INVESTMENT POLICY OF THE FUND:

The AEGON Money Market Fund is a very useful investment possibility, which substitutes the classic time deposits. These funds worldwide offer their investors numerous advantages. Money market funds are very liquid, meaning investors can take money out of them on short notice. There is no penalty for taking money out of your money market fund, unlike time deposits. These funds offer competitive and stable yields at a very low risk. According to this, the fund is only allowed to hold very safe investments, like T-bills and Hungarian government bonds with durations lower than two year. Government debt securities are considered very safe because the government has the ability to raise taxes to meet its obligations. The portfolio manager always follows the all-time liquidity and gilt-edged market trends. Since the average duration of the fund is lower than half year, the volatility of the fund is also very low. It is much lower than the volatility of a bond fund, which can contain longer government bonds. The gross yield of the Fund should reflect the yield of the short-term government securities and the yield of the t-bills.

MARKET SUMMARY:

Stronger rate cut expectations in prices and among analysts these were the main themes of the month. Bad Q4 GDP data and a lower than expected January inflation figure helped this from the macro side. The nomination of Gyorgy Matolcsy to succeed Sinasdrófi as MNB head did not surprise markets, nor does it have a significant effect on the expected rate cuts. Newsflow about eventual non-conventional measures could move the HUF and the yield curve downwards as well. It is getting difficult to find the right balance between inflation - even stronger rate cut expectations and growing - monetarization - policy - risks, which results in a slight overweight for now.
