Net Asset Value of PLN series:	13,342,993 PLN
Net Asset Value per unit:	1.076788 PLN

INVESTMENT POLICY OF THE FUND:

The AEGON Russia Equity Fund primarily targets the stock exchange-traded shares of companies that maintain an active presence in Russia or the other CIS states, or which generate a substantial proportion of their revenues in these countries. The Fund predominantly invests in equities, but its portfolio also contains bonds and discount treasury bills, currencies and money-market products, to ensure the Fund's liquidity. The equity investments are usually denominated in foreign currency; however the fund may hedge some or all of the currency risk arising from these liabilities by concluding forward or option transactions. Although the Russian and CIS market promises a high potential return, the value of investments may display a marked degree of fluctuation in the short term, and therefore it is advisable to treat the Fund as a long-term investment. The Fund Management primarily bases its investment decisions on its own fundamental analyses, but it also makes use of the information and analyses provided by other investment service providers, banks and independent research companies, in the interests of reducing risks and maximising returns. The Fund's benchmark: 95% RDX Extended Index USD + 5% ZMAX Index.

MARKET SUMMARY:

There was a slight shift and significant volatility on the main stock exchanges in February which were caused by the no-win situation of the Italian elections, the growing concerns in China and the American budget correction. In America, till the end of the month no agreement regarding the budget was reached, so the austerity measures which are to reduce spending by \$85 billion in 2013 were implemented. In terms of manufacturing outlook, US signals further improvement and the purchasing manager index increased to 1,5 year high. Even though the Chinese manufacturing index is still in the expansion territory it lags behind both analyst expectations and January data.

The Russian equity market was under pressure in February in accordance with the persistent weaker performance of the emerging markets. The crude oil price weakened due to the above mentioned uncertainties and the appreciation of the dollar also contributed to this. Out of Russian stocks the mining companies and the oil stocks performed weakly, while the impairment regarding agriculture related stocks remained limited.

ASSET ALLOCATION OF THE FUND ON 02/28/2013
