Net Asset Value of institutional series:	13,660,558 PLN
Net Asset Value per unit:	1.046942 PLN

INVESTMENT POLICY OF THE FUND:

The aim of launching the investment fund was to give investors access to the Polish bond market, and for it to function as a relatively stable, medium-risk investment in the long term, offering our customers higher yields than those attainable on bank deposits without the need for them to tie up their savings for a fixed period. The investment opportunities available to the fund are wide-ranging, so the portfolio manager has a broad remit and there is scope to build up the optimal portfolio. We aim to achieve the highest return at the lowest risk. When making investment decisions we make equal use of fundamental analysis and technical analysis tools, and always take into account the prevailing mood of investors in the market. The portfolio manager determines the potential investment opportunities on the basis of the macroeconomic forecasts, the likely yield curve and the expected return on the curve and market volatility, then selects the investments that can be regarded as safe and that ensure a relatively high yield in return for the undertaken risk.

MARKET SUMMARY:

Moves in the reporting period were driven by the global story of QE3 tapering: local fixed income markets experienced a huge collapse within three weeks but started to recover by the end of the month. This was caused by two effects: higher yields and weaker currencies shaved off several months of performance in the large benchmark indices which ignited large outflows from EM funds and the market was in search of a new level of risk premium in EM given the changing environment. We closed some of our underweight (although too early in the sell-off) but still lost some performance.

ASSET ALLOCATION OF THE FUND ON 06/30/2013
