Net Asset Value of HUF series:	8,316,912,142 HUF
Net Asset Value per unit:	2.146447 HUF

## INVESTMENT POLICY OF THE FUND:

The aim of the fund is to achieve a substantial yield for investors by taking high risks and making active use of derivative positions. The fund is decidedly high-risk, particularly due to the derivative positions it takes. The fund is willing to buy or sell all available investment instruments - domestic and foreign bonds, equities and other securities, indexes and currencies - provided it sees the opportunity to make substantial gains. In this respect the fund belongs in the category of opportunistic funds that pursue a multi-strategy investment approach. Within the multi-strategy approach pursued by the fund, 'global macro', 'long-short equity', 'convertible bond arbitrage' and 'managed futures'-type transactions dominate. In terms of asset class, the fund's investments can be divided into three main groups: it takes on extra risk in the bond, currency and equity markets, and in these markets it is prepared to take up both long and short positions within the maximum limits permitted by law, which currently allow double leverage for funds of this type. In its investment decision-making mechanism the fund assesses fundamental, technical and behavioural-psychological factors. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. To ensure liquidity the fund aims to hold government securities issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary.

## MARKET SUMMARY:

Global equity markets retreated from all-time high territory in August, driven by the ongoing uncertainties of the QE downsizing schedule and additionally, a major Syrian crisis unfolding. The unfolding Syrian crisis sparked a buying spree in crude oil, adding to concerns coming from unrests in Egypt and temporary production issues in Libya. Precious metals also benefitted from the turmoil, both gold and silver surged. FX markets, however, were less volatile, the US dollar was range-bound vs. the Euro throughout the month.

The fund reduced its successful risk position in August, global and regional equity exposure was cut back, and commodity long (silver) was cut.
