Net Asset Value of HUF series:	1,668,789,103 HUF
Net Asset Value per unit:	2.020749 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Turkish equity market, and to profit from Turkey's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The primary investment targets are the stock exchange-traded shares of companies that maintain an active presence in Turkey, or that generate a substantial proportion of their revenues in the Turkish market. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. When determining the weights, within the equity investments, of shares traded in the Turkish market, we aim to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund records its assets in forint; the fund management company may, at its own discretion, choose to hedge all or a part of its currency risks with forward currency positions, in compliance with the applicable statutory requirements. Under the current legislation the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

Global equity markets retreated from all-time high territory in August, driven by the ongoing uncertainties of the QE downsizing schedule and additionally, a major Syrian crisis unfolding. The unfolding Syrian crisis sparked a buying spree in crude oil, adding to concerns coming from unrests in Egypt and temporary production issues in Libya. Precious metals also benefitted from the turmoil, both gold and silver surged. FX markets, however, were less volatile, the US dollar was range-bound vs. the Euro throughout the month.

Investors' worry about lower global liquidity and Syrian conflict pushed Turkish equities lower in August, underperforming global and emerging equity markets by 10% in HUF terms.
