Net Asset Value of institutional series:	12,418,637 PLN
Net Asset Value per unit:	1.049777 PLN

INVESTMENT POLICY OF THE FUND:

The aim of launching the investment fund was to give investors access to the Polish bond market, and for it to function as a relatively stable, medium-risk investment in the long term, offering our customers higher yields than those attainable on bank deposits without the need for them to tie up their savings for a fixed period. The investment opportunities available to the fund are wide-ranging, so the portfolio manager has a broad remit and there is scope to build up the optimal portfolio. We aim to achieve the highest return at the lowest risk. When making investment decisions we make equal use of fundamental analysis and technical analysis tools, and always take into account the prevailing mood of investors in the market. The portfolio manager determines the potential investment opportunities on the basis of the macroeconomic forecasts, the likely yield curve and the expected return on the curve and market volatility, then selects the investments that can be regarded as safe and that ensure a relatively high yield in return for the undertaken risk.

MARKET SUMMARY:

International sentiment was driven by fears of nearing Fed tapering again which caused significant fall of bond prices globally, especially weighing on emerging markets. As investor sentiment turned to be negative and another round of significant capital outflows hit emerging markets, polish bond prices decreased materially: almost the whole yield curve shifted upwards by 40-60 bps. Local story played a role mostly in the short end of the yield curve: given the signs of an upswing in economy and a bit higher inflation, FRAs are higher, though we expect that, policy rate will be unchanged for the foreseeable future.

ASSET ALLOCATION OF THE FUND ON 08/31/2013
