Net Asset Value of PLN series:	13,874,372 PLN
Net Asset Value per unit:	0.998480 PLN

INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

MARKET SUMMARY:

As summer was coming to its end, the anticipated Fed tapering kept the sentiment quite nervous on the global bond markets. As a sign of the investors' nervousness the yield of the US 10 year treasury has risen to its two-year-peak, and the outflow from the emerging markets has been continuous. Bond positions of the fund suffered a bit, but low duration carry instruments performed well relative to the bond asset class. Meanwhile, global equity markets retreated from all-time high territory in August, driven by the ongoing uncertainties of the QE downsizing schedule and additionally, a major Syrian crisis unfolding, which was a drag to our performance.
