Total Net Asset Value of the whole Fund:	18,338,741 PLN
Net Asset Value of HUF series:	481,999 HUF
Net Asset Value per unit:	1.216865 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Polish equity market, and to profit from Poland's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The fund's primary investment targets are the exchange-traded securities of companies that are active in Poland or that generate the bulk of their revenues there, or whose shares are listed on the Warsaw Stock Exchange. The fund may also invest in the shares of other Central and Eastern European corporations. These are listed as Austria, the Czech Republic, Hungary, Russia, Romania and Turkey; although the portfolio will always chiefly consist of the shares of companies listed on the Warsaw Stock Exchange. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, only publicly issued securities listed or in the process of being listed on the stock exchange will be purchased as equity investments. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The weights of the shares within the portfolio are determined so as to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund holds more than 30% of its assets in a currency other than the domestic currency (HUF). In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

The leading equity indices started the year with weak performance. The correction was due to exaggerated optimism and the over positioning in the equity markets. The downward direction was supported by the weaker than expected Chinese macro data and the persistent liquidity tightening. Fed cut back the bond buyback program again by USD10bn; however market reactions were not optimistic like in December. The worsening sentiment and liquidity tightening primarily affected emerging market currencies and bond markets, while the correction on the equity markets affected all regions.

Majority of the regional indices fell in January; the Polish WIG20 index fell by 4,3%, the Czech market declined by 0,3% and the Hungarian equity index lost 2,9% in EUR terms. Purchasing manager indices in CE3 region strengthened in January supported by German pick up. However, strengthening macro picture cannot offset the negative impact of the emerging market sell-off.

ASSET ALLOCATION OF THE FUND ON 01/31/2014
