Net Asset Value of HUF series:	1,242,663,329 HUF
Net Asset Value per unit:	1.125588 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

Risk and Reward Profile:

MARKET SUMMARY:

Most of the major equity indices closed the month almost flat, however, markets remained volatile throughout April. The Ukrainian crisis was one again in focus, as open military conflict has spread to Eastern and Southern part of Ukraine. European equities kept underperforming US markets as investors remained concerned about sanctions as well as diminishing economic outlook. The US earnings season delivered mixed results as the S&P500 companies managed to beat the consensus on the bottom line level, but failed to surpass expectations in terms of sales. The FED went on with downsizing its QE programme in line with expectations, thus market reaction was muted.

In China the macro outlook is still gloomy, the manufacturing activity is still in the recession territory, moreover the Chinese export showed a significant drop. Despite the weakening macro data, the Chinese leadership ruled out the possibility of a greater stimulus. At the beginning of April, the elections started in India and in Indonesia; both of the countries opposition victory is expected. The expectation from the market friendly opposition BJP party is to set back the Indian economy's growth trajectory.
