Net Asset Value of EUR series:	781,547 EUR
Net Asset Value per unit:	0.985576 EUR

INVESTMENT POLICY OF THE FUND:

The fund aims to grow the euro-based savings invested in it through returns that exceed the interest rates attainable on bank deposits. The fund is a money-market fund with a broad investment policy, issued in euro, which combines the fund management company's emerging-markets expertise with the safety of classic money-market funds. The fund may invest in the investment instruments permitted by law, with special regard to the money and bond markets. The fund may not hold shares. The fund's investment focus is on short-term government and corporate euro bonds. In the interest of achieving a stable traded price and low volatility we keep the fund's interest risk low; the fund's average modified duration may not exceed one year. Besides traditional money-market instruments (treasury bills, government securities), the fund aims to ensure a higher yield than that of traditional money-market instruments by purchasing mortgage and corporate bonds, and by taking advantage of the premiums that these offer. When selecting these instruments the fund sets strict quality requirements, and may not hold securities that are below investment-grade or do not have a credit rating, except for bonds issued or guaranteed by the State of Hungary. The fund can only open long positions, and is not permitted to open uncovered short positions. It may only open forward contracts for the purposes of hedging or portfolio optimisation. The fund may not use leverage. The fund aims to choose as freely as possible among the opportunities available in the domestic and international capital markets, exercising the caution that is consistent with the fund's investment strategy. The fund records its assets in euro, and endeavours to fully hedge its exposures in other currencies.

Risk and Reward Profile:

MARKET SUMMARY:

June has turned in another positive performance across emerging markets fixed income. However, many credits have traded tighter and the indices ended at 284 bps for sovereigns and 297 bps for corporates, a tightening of 7 bps and 10 bps respectively during the month. Tensions in eastern Ukraine have continued to erupt frequently as Ukrainian authorities in Kiev has attempted to re-gain administrative control of cities. Should the status quo of low intensity conflict continue and no serious escalation in sanctions occurs, emerging markets assets can continue trending higher. Global growth remains weak, while tensions in eastern Ukraine continue to simmer, with sanctions on Russia from the US and Europe taking a backseat in priorities. The string of economic data for May has affirmed the slowdown in global growth. The regional exception within EM has been the CEE region which is seeing growth. Investors are increasingly focused on the medium-term EM fundamental challenges, and less so on US monetary policy. Russia-Ukraine and Iraq conflict remains the near-term risk for emerging markets.

ASSET ALLOCATION OF THE FUND ON 06/30/2014
