Total Net Asset Value of the whole Fund:	6,373,518,833 HUF
Net Asset Value of PI series:	115,896 PLN
Net Asset Value per unit:	1.158956 PLN

## INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Turkish equity market, and to profit from Turkey's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The primary investment targets are the stock exchange-traded shares of companies that maintain an active presence in Turkey, or that generate a substantial proportion of their revenues in the Turkish market. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. When determining the weights, within the equity investments, of shares traded in the Turkish market, we aim to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund records its assets in forint; the fund management company may, at its own discretion, choose to hedge all or a part of its currency risks with forward currency positions, in compliance with the applicable statutory requirements. Under the current legislation the proportion of shares in the portfolio may be up to 100%.

## MARKET SUMMARY:

Equity markets continued to fluctuate around historical highs throughout September. Once again the S&P 500 managed to break new all-time records fuelled by solid corporate earnings revision trajectories and the exceptional strength of the US economy. European indices, on the other hand, kept underperforming US ones as anemic growth prospects weighed on equity prices. China macro data also continued to disappoint with softer PMIs and a set of deteriorating underlying economic activity indicators published. With US interest rate hikes on the horizon and the ECB in the easing phase, the USD surged against all major currencies, particularly the EUR. Commodities tumbled across the board from crude prices to industrial metals, basic materials and precious metals due to the pressure stemming from the enormous USD appreciation and the weak European and Chinese growth outlook. The equity market correction prevailed more in the emerging markets, so Turkey couldn't back out of the correction neither. The Turkish lira weakened, the government bond yields started to increase and the equity market got under pressure due to the fear of higher global rates.

## ASSET ALLOCATION OF THE FUND ON 09/30/2014
