Net Asset Value of HUF series:	2,675,892,479 HUF
Net Asset Value per unit:	1.240277 HUF

## INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Polish equity market, and to profit from Poland's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The fund's primary investment targets are the exchange-traded securities of companies that are active in Poland or that generate the bulk of their revenues there, or whose shares are listed on the Warsaw Stock Exchange. The fund may also invest in the shares of other Central and Eastern European corporations. These are listed as Austria, the Czech Republic, Hungary, Russia, Romania and Turkey; although the portfolio will always chiefly consist of the shares of companies listed on the Warsaw Stock Exchange. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, only publicly issued securities listed or in the process of being listed on the stock exchange will be purchased as equity investments. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The weights of the shares within the portfolio are determined so as to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund holds more than 30% of its assets in a currency other than the domestic currency (HUF). In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

## RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields:	13.63 %
Annualized standard deviation of the benchmark's weekly yields:	13.77 %

## MARKET SUMMARY:

Equity markets kept surging throughout February primarily fuelled by ECB stimulus and the benign effects of low oil prices. Most of the major developed indices managed to break new all time highs, even the Nasdaq composite approached its dotcom bubble era highs set in 2000. European indices once again outperformed the S&P500 in February on weak euro and healthier corporate earnings revisions. The US earnings season painted a mixed picture with above consensus Q4 figures, though soft FY earnings revision trends on FX and oil-linked issues. Crude oil prices performed mixed as the Brent kept rising in February, while the WTI remained flat on storage capacity concerns.

All CEE indices increased in February but the Hungarian equity market strengthened the most. Leading indicators were positive in Poland however, macro data worsened somewhat like retail sales, industrial production and unemployment rate. Polish regulator announced a proposal in connection with the potential mortgage conversion from CHF to PLN. Only the banking sector closed the month in the negative territory, every other sector was in the black.

## ASSET ALLOCATION OF THE FUND ON 02/28/2015
