Net Asset Value of PLN series:	18,002,173 PLN
Net Asset Value per unit:	1.112594 PLN

INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

Risk and Reward Profile:

MARKET SUMMARY:

Core market yields, particularly German yields continued their climb, weighing on global bond markets. Although yields fell from the middle of the month but still closed May higher. Higher bond market volatility weighed on risky markets in general, forcing us to decrease equity weight in the fund, leaving us with only banks, Japanese and CEE exposure in equities. We exploited the rise in yields on the Hungarian market by adding short maturity bonds to the fund as we experienced massive local demand for duration. We opened long HUF exposure which worked ok against the PLN, less so against the EUR.

ASSET ALLOCATION OF THE FUND ON 05/31/2015
