Net Asset Value of HUF series:	1,924,264,732 HUF
Net Asset Value per unit:	1.284169 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

Annualized standard deviation of the fund's weekly yields:	23.93 %
Annualized standard deviation of the benchmark's weekly yields:	22.56 %

MARKET SUMMARY:

Equity markets started 2016 with sharp selloff induced by deteriorating global macro picture. Commodity prices were under huge pressure especially crude oil, which tumbled to decade lows on storage capacity concerns. Precious metals, on the other hand, managed to appreciate supported by the weakening of the USD vs. EUR. Regardless of the somewhat better macro prospects, European indices once again lagged behind the S&P500 in January.

The fall in the Asian equity markets continued in January and China suffered the most. The correction in Chinese equities was mainly due to several liquidity dampening measures, weakening of the yuan and weak macro data. Fears concerning the Chinese economic slowdown intensified again in the beginning of the year.
