Start:	10/29/2007
Currency:	EUR
Total Net Asset Value of the whole Fund:	2,675,511,121 HUF
Net Asset Value of EUR series:	297,935 EUR
Net Asset Value per unit:	1.335218 EUR

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

MARKET SUMMARY:

At the beginning of February, the stock markets suffered their worst time since 2015. The selloff could have been catalyzed by the record inflows to the markets, the excessive stock market positioning and the accelerating rise in yields; but according to some experts, US wage statistics have also been involved because they saw an overheated labour market in the data.

The record amount of cash inflows turned around after the correction, causing a \$30.6 billion outflow from equity funds, which is the highest ever value.

In February, the US federal government stopped for a while again, after failing to vote for the necessary budget law in the Senate. The higher than expected inflation figures had no negative impact on the stock markets, but the probability of the interest rates hikes in March has increased to 83%. The 10-year US government yield reached 2.95 percent, thus the US yields rose to a new 4-year high.

At the beginning of the month, the Euro and the Forint were also at a three-year high against the Dollar but after a stronger US labour market data, the US currency began to pick up after unemployment figures reported that the overseas economy is in good shape which could influence the FED's interest rate hikes as well. Emmanuel Macron's party lost two parliamentary interim elections this month; they lost more than half of last year's voters in both districts, so the decreasing popularity of the president has a negative impact on his party as well. In February, the German grand-coalition agreement was reached after the CDU/CSU made significant concessions to the SPD.

Fitch upgraded the Greek debt by one degree from B- to B, while Russia received first S&P upgrade to BBB-, exiting the junk status.

Oil prices have fallen to a one-month lows as a result of the higher than expected supplies but after the Saudi oil minister's statement that they are producing significantly under the OPEC quota in the first quarter and due to the decreasing inventory data the oil prices have rebounded.

In February, the Japanese market outperformed in Dollar terms compared to the Indian and Chinese markets, thus our Japanese overweight positions had a positive effect on the fund's performance. We think that the Chinese equities are still slightly attractive as it has a favourable valuation and positive earnings in the global context.

ASSET ALLOCATION OF THE FUND ON 02/28/2018

Asset type	Weight
