Net Asset Value of institutional series:	103,978,624 PLN
Net Asset Value per unit:	1.252052 PLN

INVESTMENT POLICY OF THE FUND:

The aim of the investment fund is to give investors access to the Polish bond market and to function as a relatively stable, medium-risk investment already medium term, offering our customers stable real returns without the need to tie up their savings for a fixed period. The fund primarily invests into Zloty denominated Polish government bonds but the portfolio manager has some room to use other fixed income investments. We aim to maximise returns with the given risk level. Our investment decisions are based on fundamental research extended by technical research while we also take into account global market sentiment. Expected shifts in the yield curve based on our macro expectations are at the core of our investment process. Risk/return characteristics are also considered when we select suitable and safe investments. We aim to totally hedge any currency risk in the fund.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields:	1.67 %
Annualized standard deviation of the benchmark's weekly yields:	1.69 %

MARKET SUMMARY:

Local news played a less important role in April. Low issuance, redemptions in PLN, low inflation, dovish central bank helped, but this affect faded during the month. According to our opinion most of the good news were already in the price so we took profit on our long positions during the month, taking the stretched levels into consideration too. Global bond yields shaped the Polish bond market too. At the beginning of the month global bond yields could decrease, but mostly based on the commodity price spike yields started to increase from stretched levels. Key levels (3% in case of Treasury, 60-65 bps in case of Bund) proved to be a strong resistance level for now, but we are less bullish on Polgbs for the next months.

ASSET ALLOCATION OF THE FUND ON 04/30/2018
