Net Asset Value of EUR series:	532,251 EUR
Net Asset Value per unit:	0.008593 EUR

INVESTMENT POLICY OF THE FUND:

The objective of the Fund is to benefit from long term, global megatrends. These trends include demographic changes (aging society, emerging markets), efficiency improvements due to depletion of scarce resources (renewable resources, energy efficiency), urbanization, or even technical developments and innovations. To achieving the main objectives, the Fund primarily invests in exchange traded funds, secondly in open-end mutual funds. Megatrends are long term changes that will permanently and significantly alter our social and economic environment. The Fund wishes to invest in companies and sectors likely to benefit from these trends. Thanks to its characteristic, the Fund mainly holds sector and thematic ETFs and mutual funds. Megatrends are very long-term, generally global trends, which are spanning economic cycles. Therefore the Fund invests in global markets without any geographical specification. As the Funds profit from very long term trends and exposed heavily to equity markets, we recommend the Fund for long term, risk seeking investors. The type of the Fund is fund of funds, which, according to their investment policy, have to invest in at least 80% of their assets into ETFs and mutual funds. At the same time, the maximum exposure of each fund is not exceeding 20% of their total assets. The Fund only invests in instruments with total expense ratio below 2.5% and intent to maintain the average expense ratio below 1%.

MARKET SUMMARY:

At the beginning of October, America and Canada managed to come to an agreement about the NAFTA which even gave a positive boost to the market thus the American main equity indices managed to hit a new absolute peak. However, in the middle of the month, the deteriorating technical picture, rising US yields, weak new home sales data and fears of slowing down global growth triggered significant drops in the markets that had not been seen since February. The fall was suffered mainly by the market leader equities thus significant profit taking were made in the US technology sector where these papers has not reported such a fall in a single day since August 2011. The Chinese spying case also caused tension in the markets; according to the news Chinese spies have placed chips in the assets of more than 30 companies (including US agencies) which allows secret access to internal networks. This has further intensified the tension between America and China and we believe that this case may have further negative impacts on the future. In addition, according to Bloomberg's information, Trump plans to impose tariff on Chinese good worth \$257 billion, if they can not reach a common agreement at the meeting with the Chinese President, Xi Jinping in November. This statement was attributed by the market to the negotiating style of the US president and to the midterm elections in 6th of November but by the end of the month, the US President spoke of the negotiations in high terms.

European stocks also fell sharply last month, partly because of the global stock market correction and on the other hand, the further rise in Italian yield spreads and the growing fears of Brexit put pressure on the markets. The Euro also weakened against the dollar last month; at the end of October, the EURUSD pair fell down to the level of 1.13.

The oil price also closed in the red last month; although, at the beginning of October, it was still close to 4 years highs but by the end of the month it fell by more than 15%. The fall has been attributed to the profit takings, possible growth in Saudi production, the negative impact on the oil demand caused by the trade war and the news that America has granted a temporary, 180-day exemption from the sale ban to eight buyers (8 countries) of Iranian oil.

The fund started the new month with the renewed allocation, unfortunately the start date of the fund was unlucky as the growths sector suffered the biggest fall in October. At the beginning of the month, we bought some individual stocks into the fund but they were sold before the bigger correction. The fund's performance was negatively influenced by the Marijuana ETF but since then this exposure has significantly risen. Despite the correction, we believe that long-term trends have not been damaged or broken thus we continue to hold our positions.

ASSET ALLOCATION OF THE FUND ON 10/31/2018

Asset type	Weight
Collective securities	91.51 %
