Currency:	EUR
Total Net Asset Value of the whole Fund:	15,043,067 EUR
Net Asset Value of EUR series:	656,782 EUR
Net Asset Value per unit:	1.048751 EUR

## INVESTMENT POLICY OF THE FUND:

The fund's investment objective is to provide investors with capital appreciation by investing in the sovereign- and quasi-sovereign bond market of Emerging European countries. The fund has no rating constraints, the fund has a permission to invest in any kind of issuer without limitation on its long-term foreign currency debt rating. The fund aims to reach the highest capital gain with rational risk taking. The fund primarily invests on the sovereign- and quasi-sovereign bond market of Emerging European countries denominated in foreign currency, but holds Hungarian local currency, long- and short-term bonds with diversification and liquidity management purposes. The fund may also invest in mortgage backed securities, and short- and long-term, fixed or floating securities of other financial institutions, municipalities or other business corporations, structured and convertible bonds. The fund's general risk level and the measure of the deviation from the target weights are determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The core part of the fund consists of the foreign currency denominated, sovereign and quasi-sovereign bonds of Central and Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), Southeast Europe (Serbia, Turkey), Baltic states (Lithuania, Latvia) and the countries of the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and also holds Hungarian local currency bonds with diversification and liquidity management purposes. In case of attractive market conditions (e.g. possible upgrade of an issuer's long-term foreign currency debt rating, change of the yield curve, market mispricing, etc.) the fund may invest in bonds of issuers not listed above. The fund does not intend to invest more than 25% of its assets in a single country. The target weight for the fund's fixed income investments in the above listed countries (target countries) is 95%. The aimed risk profile of the fund is intermediate. We do not use constraints on foreign currency debt ratings. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged debt-type collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged to the target currency (USD), although depending on market circumstances the fund may even have an open currency position. The investment policy of the fund changed on the 30th of December, 2016. Since then the fund has no benchmark, and fund performance before the change is not applicable.

## MARKET SUMMARY:

Donald Trump and president Xi Jinping managed to come to a trade truce on the G-20 meeting in Osaka and agreed to continue with the trade negotiations. In Europe, Boris Johnson was elected to be the UK's next prime minister, who is known to be a Hard-Brexit and did not wait long to promise that the UK will leave the EU at the end of October whatever happens. The global macro picture paints a mixed picture. The US data is still somewhat robust, while China and Europe are struggling more. Maybe this is the reason why Mario Draghi, resigning ECB president said that the ECB won't rule out any tool to stimulate the European economy. The German 10yr government bond already started to price in the new wave of monetary stimulus and managed to decrease to its lows in yield after Draghi's comments. The FOMC held its meeting at the end of the month where it decided to lower the base rate by 25 basispoints in line with expectations. However, Jerome Powell Fed chair gave a speech that turned out somewhat more hawkish which took the market by surprise. In this environment EM USD sovereign credit papers performed well, their yield spread tightened by 27 basispoints. We increased our Turkish exposure and decreased our Romanian one.

## ASSET ALLOCATION OF THE FUND ON 07/31/2019
