Net Asset Value of HUF series:	7,284,601,496 HUF
Net Asset Value per unit:	1.513850 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Özon Capital Protected Fund.

MARKET SUMMARY:

There were big changes in December on both sides of the pond. In England it became final that they will the EU, and in the U.S. President Trump hit a friendlier tone with the Chinese, he will not escalate the trade war, and will not implement new tariffs. In its usual December meeting, FED president Jay Powell announced that he would raise rates only if he sees a permanent rise in inflation. Based on the macroeconomic numbers, the U.S. economy is steadily growing, the factory orders grew by 0,3% and the weekly unemployment rate is at a 7 months low. The Eurozone economy is not as bright. The industrial output and PMI numbers do not show an optimistic future yet. Lagarde, the new ECB president announced in her first press conference, that she thinks that the euro economy needs more supportive action from the central bank, as long as inflation remains at these levels. The largest economy in Asia beginning to recover from its slowdown. The Chinese Caixin index went to a seven months high. But because of the swine flu, the YoY inflation reached 4,5% in November, which was higher than expected, and overall it was a lot higher than October's 3,8%. In Hungary the central bank didn't change its leading interest rate. The HUF is trying to consolidate at around the 330 EUR/HUF level. The fund had a slight positive return in December, and all its investments had a positive return. The biggest yields had been achieved by the equity focused absolute and total return funds, such as the Maraton, Alfa, and Panoráma.
