Net Asset Value of HUF series:	6,311,930,439 HUF
Net Asset Value per unit:	1.324413 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.

Aegon Emerging Europe Bond Fund	0.0%
Total:	100%

MARKET SUMMARY:

Since the end of February, the whole world "caught the fever" by the corona virus. Thanks to the virus, new negative records have been broken in stock market. The U.S. stock market has never fallen 20% from a new all-time high of as fast as it did in March. The virus has moved westward from China, destroying economies, leaving a masses of unemployed behind. Fed President Jay Powell said in February that the U.S. economy is okay, but he is keeping an eye on the potential dangers posed by the virus and, if necessary, changing the central bank's fiscal policy. As it became clear how destructive to the economy the virus is in Europe, the Fed went into action. The Fed funds rate was first cut by 50 basis points and then to zero, before March Fed meeting, and when this didn't have any meaningful impact the central bank announced unlimited QE. Politicians did not put their heads in the sand either, as they did in 2008-09, and voted for an unprecedented economic stimulus package in both U.S. and in Europe. The macroeconomic data in both the developed and emerging economies are the worst that has come out in the last 10 years. Economic leaders hope this is an external shock, and when it passes, economies will return to the level they were before the virus appeared. To achieve this, extraordinary economic rescue packages have been passed, that will help both the private sector and the general public. The Hungarian economy was also affected by the virus. Both the BUX index and the forint sold off very sharply. When the EUR-HUF cross rate rose to 360, the Hungarian National Bank verbally intervened, which helped to go back to 350, but weakened back to a new low by the end of the month. The fund achieved a negative return in March after the stock market performance was affected by the negative impact of the crown virus. The fund's total investments fell, with Bondmaxx and Moneymaxx funds suffering the least.
