Total Net Asset Value of the whole Fund:	17,795,917,807 HUF
Net Asset Value of EUR series:	898,644 EUR
Net Asset Value per unit:	1.235207 EUR

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

Just like last few months the corona virus was the focus of world's attention in June. The first wave of the epidemic appears to have subsided in Asia and Europe, while in the United States it depends on the state what stage it is at. This is a major problem for the economy. The US Federal Reserve is doing everything it can to ease the pressure on the economy, but it does not have unlimited power. The taboos are starting to fall, as the St. Louis Fed President has already admitted that even negative interest rates could be used to kick-start the economy. In Europe, the ECB is working feverishly to figure out how to get the economy back on track as soon as possible. The central bank has increased its bond-buying program to € 600 billion, compared to the expected € 500 billion, and its duration has been extended to at least the end of June 2021. More and more positive economic data is coming out of China. What may cast a shadow over the joy that nearly 80 new infections have been found in Beijing by Sunday, raising the possibility that the second wave of the virus has arrived. In Hungary, the MNB reduced the key interest rate by 15 basis points at its June meeting. The decision is incomprehensible to us, as EURHUF has finally stabilized around 340 and 15 basis points is insignificant for the economy. The MNB also indicated that a further decline in interest rates is expected. The forint did not take the news well, and weakened by almost 5% against the euro within a week. The fund achieved a positive return in June, and performed same as the benchmark. We held a slight underweight in the fund. Within developed markets, America performed the developed market average, while Europe outperformed and Japan underperformed in dollar terms. The fund is slightly underweight in the U.S. and European markets, however, this did not lower the fund's monthly performance due to positions in growth sectors undertaken within the U.S. market. The fund continues to pursue a growth strategy in the U.S. market with an overweight in the video game, technology, and fintech sectors.

ASSET ALLOCATION OF THE FUND ON 06/30/2020
