Total Net Asset Value of the whole Fund:	120,890,983 PLN
Net Asset Value of PLN series:	120,575,055 PLN
Net Asset Value per unit:	1.095867 PLN

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to function as a stable, low-risk investment vehicle, but to offer investors better returns than the performance of the current benchmark index. The fund is a standard variable net asset value money market fund. The portfolio elements are selected in accordance with these and the Money Market Funds' principles. The portfolio elements are selected in accordance with the above mentioned principles and based on the EU wide regulation on money market funds. To ensure liquidity the fund manager primarily aims to hold government bonds and discount treasury bills issued by the Polish Debt Management Agency, and short-term instruments (e.g. deposits, repos) available on the interbank market. The fund is allowed to invest in securities issued or guaranteed by any EU member state, and in money market instruments issued or guaranteed by a supranational institution established in the EU in accordance with the Money Market Funds Regulation. The fund is only allowed to invest in debt securities, which are classified as investment grade on average by the external credit rating agencies. In addition, some financial assets, which are particularly addressed by the EU wide money market regulation, shall have a favourable assessment based on the internal credit quality assessment procedure. The fund may also hold investment units or shares within the framework of the Money Market Funds Regulation. The Fund invests at least 50% of its assets in PLN denominated assets (money market instruments issued or guaranteed by the Polish state; deposits; cash), also fulfilling the diversification requirements of the Money Market Funds Regulation. The Fund shall have a weighted average maturity no more than 6 months, and a weighted average life no more than 12 months. Moreover, the Fund shall also be allowed to invest in money market instruments with a residual maturity until the legal redemption date of less than or equal to 2 years, provided that the time remaining until the next interest rate reset date is less than or equal to 397 days. The fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk (the difference between the currency risk exposure of the derivative instrument and the hedged instrument can be maximum 5%). Aegon Polish Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in Aegon Polish Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in Aegon Polish Moneymarket Fund is capable of fluctuation. Aegon Polish Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY:

In February, we saw a strong rise in yields on the Polish bond market. Yields closed higher by 22 basis points at 3-year maturity, 32 basis points at 5-year maturity and 45 basis points at 10-year maturity, thus increasing the slope of the yield curve. The sell-off was mainly due to the globally rising inflation expectations. Moving on to economic data, Polish GDP contracted by 2.8% in 2020. However, according to the February survey the economic growth is expected to be 3.7% in 2021 and 4.7% in 2022. GDP growth in the first quarter was reduced from -1.9% to -2%, and growth is expected to be 8.9% in the second quarter. Better-than-expected macro data would justify higher yields, but they are offset by global liquidity and QE programs. Year-on-year inflation accelerated to 2.7% in January, well above expectations. The government has allowed retail stores to reopen from February 1, so consumption could pick up again, which also could have an impact on prices. The Purchasing Managers' Index rose from 51.9 in January to 53.4 in February, exceeding market expectations. New orders started to grow strongly, due to exports. Industrial production grew 0.9% in the first month of the year, outperforming market expectations by 0.6%. As for general government, in January the government generated a surplus of PLN 6,645.4 million, bringing the 12-month rolling budget deficit to 3.53% of GDP.
