Total Net Asset Value of the whole Fund:	7,053,658,884 HUF
Net Asset Value of R series:	990,985 HUF
Net Asset Value per unit:	0.990985 HUF

## INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ozon Capital Protected Fund.

Aegon Panorama Derivative Investment Fund	20.5%
Aegon Emerging Europe Bond Fund	0.0%
<b>Total:</b>	<b>100%</b>

## MARKET SUMMARY:

The fear overwhelmed the stock markets in late February as 5-10-30 year US bond yields hit new highs. What caused the problem was, that not only nominal but also real interest rates rose, which could later be a problem for the economy. The U.S. Federal Reserve has previously communicated that they don't mind if long-term interest rates go up, they monitor short-term ones and make decisions based on it. If interest rates continue to rise, the Fed will have to decide whether, it will keep its promise that it will not raise the benchmark rate for the next 2 years or it will introduce a yield curve control. The European economy is mixed. The Eurozone Services Sector Purchasing Managers' Index fell from 54.4 to 44.7, marking a contraction for the sixth month in a row. In contrast, the manufacturing PMI jumped from 54.8 to 57.7, which has not seen such a high reading since February 2018. The composite indicator, formed by the weighting of the two, climbed back from 47.8 to 48.1, yet it is still the fifth month below the crucial 50 mark. Although China's and other Asian countries' economies may already be behind the coronavirus-induced crisis, China's macro data has begun to weaken. The Caixin Manufacturing PMI, which measures the output of smaller firms and exporters, fell to 51.5 from 53.5 in the previous month, and the index measuring the service sector also fell from 55.7 to 52.4. Although the economies of the Far Eastern countries have been much less affected by the epidemic, booming world trade remains an important factor for them and they will therefore have to wait for the spread of the epidemic to subside in the developed countries. The coronavirus continues to spread in Hungary without control. Although the spread seemed to be slowing down in early February, it unfortunately gained new momentum by the end of the month. Nothing has yet materialized from the previously announced economic stimulus package, and unfortunately more and more small businesses, especially those interested in hospitality, are closing permanently. The forint depreciated by 1.5% against the euro during the month. The fund achieved a positive return in February after all of the fund's investments were able to show a positive return. The best returns were achieved by Panorama and the Alpha Fund, followed closely by the Maraton, but Moneymaxx was also able to show a slight positive return.

## ASSET ALLOCATION OF THE FUND ON 02/28/2021
