Aegon BondMaxx Absolute Return Bond Investment Fund

PI series

MONTHLY report - 2022 SEPTEMBER (made on: 09/30/2022)

INVESTMENT POLICY OF THE FUND

The Fund is an absolute return investment fund that aims to create an investment portfolio through active portfolio management that achieves a return for its clients in excess of the benchmark, taking into account a predetermined risk profile. It intends to accomplish this goal primarily by investing on the bond market of the emerging European region. When implementing the Fund's investment strategy, the Fund Manager focuses primarily on emerging European hard-currency (dollar, euro) government and corporate bonds, leveraging its regional expertise. For diversification purposes, the Fund may also purchase other bonds (government securities, corporate bonds, mortgage bonds) typically issued in the region and denominated in local currency, and in addition, it may also conclude forward and other derivative transactions in order to establish an efficient portfolio. We aim to achieve a moderate risk profile when compiling the Fund's portfolio. The Fund makes its investments based on an extensive analysis of the issuer's creditworthiness, including a comprehensive assessment of the risks involved, especially with regard to non-investment grade issuers. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of improving portfolio efficiency. The Fund may also hold units of non-leveraged collective investment schemes that track derivative indices. The Fund may also take on significant foreign currency exposure, which is normally fully covered by the Fund Manager, but depending on market conditions, the Fund may have an open foreign currency position. The Fund seeks to provide returns to its investors primarily through its bond investments.
