

## INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.
