

INVESTMENT POLICY OF THE FUND

The Fund's objective is to establish a portfolio for its Investors that generates positive returns – higher than the yields available on the domestic money market – under all circumstances, i.e. the Fund pursues a “total return” strategy. The Fund seeks to achieve this goal by selecting, through various analytical techniques, the asset classes and investment funds that have the greatest price growth potential and make investments through the purchase of investment units and collective investment securities. The Fund invests primarily in investment funds managed by Aegon Magyarország Befektetési Alapkezelő Zrt., but may also purchase other investment funds and collective investment securities in its portfolio for diversification purposes or if the given asset class is not yet covered by the Fund Manager's funds. In order to ensure liquidity, the Fund may hold in its portfolio discount treasury bills and government bonds issued by the Government Debt Management Agency (ÁKK), interest-bearing securities guaranteed by the Hungarian State, and bonds issued by the MNB. As the range of possible investments includes investments denominated in foreign currency, ETFs and investment units, the Fund's investors may also bear some foreign exchange risk. According to the Fund's investment policy, it invests or may invest more than 80 percent of its assets in investment units or other securities issued by a collective investment undertaking. However, the Fund does not intend to hold more than 20% weight in any one investment fund, except for the Aegon Money Market Fund, Aegon Domestic Bond Fund, Aegon MoneyMaxx Total Return Fund, Aegon Alfa Absolute Investment Fund, Aegon Bondmaxx Absolute Return Bond Fund, Aegon Maraton Active Mixed Fund, Aegon Panoráma Derivative Fund and Aegon ÓzonMaxx Absolute Return Fund, the weight of which may be as much as 100% within the Fund's portfolio.

MARKET SUMMARY

In September, inflation and other macro data prompted the US Federal Reserve to raise its benchmark interest rate by a further 75 basis points to 3.25%, and policy makers forecast further increases of 75-50-25 basis points. Rising US interest rates, which only further strengthen the dollar in the currency markets, have become a source of serious problems in the international financial markets. Japan's finance ministry has intervened in the foreign exchange market for the first time in 24 years, and the UK central bank will be forced to buy bonds at L5bn a day for 13 days, while postponing its QT program, which was due to start in October and would have involved selling L80bn of assets. The big question for the period ahead is when the US Federal Reserve will stop raising interest rates, but this is unlikely to happen until macro data starts to weaken.

The higher than expected inflation data in Europe, which in some center states such as the Netherlands showed a significant almost annual 14%, left the ECB with no choice but to raise the base rate by 75 basis points and the market expects another 50 basis point increase in October.

Inflation remains a major concern in Hungary. According to the latest MNB Inflation Report, inflation is expected to peak in the 19%-22% range, but it is not ruled out that it will be above 22 percent. The big spike could come as early as September due to the increase in the public utility bill and the summer drought. In September, the central bank raised the base rate further by 125 basis points to 13%. The forint weakened to a new low against the euro when it crossed the 420 level.

The fund posted a negative return in September. Both the bond and equity asset classes posted negative returns for the month and this weighed on the fund's returns. The Panorama fund was flat, but Alfa, Maraton and Moneymaxx had negative returns due to higher risk exposure. Alfa, Maraton and MoneyMaxx all reported that performance was eroded mainly by positions in HUF and Hungarian bond exposure, with none of the funds holding significant equity market exposure. With the economic conditions shown by the investment clock pointing to a recession, these funds are looking for longer-term investment opportunities in bond markets.
