

## INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The core of the Fund's investments is Central Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), South East Europe (Serbia, Turkey), the Baltics (Latvia, Lithuania) and the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and bonds of majority state-owned companies, in addition to which the Fund holds short-term and long-term Hungarian government securities for diversification and liquidity management purposes. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.

## MARKET SUMMARY

Last month, both major central banks, the Fed and the ECB, raised their policy rates by 50 basis points, set off hawkish and indicated that further tightening is needed to ensure a timely return of inflation to target. On the data front, in the US, the CPI print for November pointed to cooling inflation, while retail sales fell. Eurozone PMIs signalled milder contraction amid easing price pressure. In China, industrial production and retail sales data showed meaningful deterioration. The boost to risk appetite from US CPI was progressively reabsorbed as hawkish central-bank comments were digested and global equities look set to finish the week in the red. The 10Y UST yield moved higher and almost reached the 3.90% area and EGB yields rose more sizably, with curves bear-flattening and periphery spreads widening. The 2Y Schatz yield climbed to its highest level since 2008, and the 10Y BTP-Bund spread widened to 215bp. In FX, EUR-USD tested 1.07 before falling back, while EUR-GBP rebounded to 0.87. We slightly added to the Polish risk along with moving Hungarian exposure back to neutral levels from slightly elevated exposure.

## GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	The fund has no benchmark
ISIN code:	HU0000724257
Start:	12/29/2020
Currency:	HUF
