

INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The core of the Fund's investments is Central Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), South East Europe (Serbia, Turkey), the Baltics (Latvia, Lithuania) and the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and bonds of majority state-owned companies, in addition to which the Fund holds short-term and long-term Hungarian government securities for diversification and liquidity management purposes. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.

MARKET SUMMARY

Last month, the Chinese GDP figure for the first quarter of the year showed a surprisingly strong recovery of 2.2% QoQ after 0.6% in Q4 '22. The Eurozone composite PMI increased for the sixth consecutive month and hit its highest level in almost a year, driven by services. US core PCE inflation came in higher than expected for Q1 '23, while national April CPI data published so far for Eurozone countries suggests core inflation may have peaked. US GDP growth slowed to 0.3% QoQ (non-annualized) in Q1 '23, while Eurozone GDP growth picked up slightly, to 0.1% QoQ. German IFO business expectations rose for a sixth-consecutive last month. The FED minutes revealed that "several" participants had considered a pause while "some" others contemplated a 50bp hike. In the euro area, European Central Bank (ECB) rhetoric started to tilt again to the hawkish side, while industrial production expanded solidly for a second consecutive month. On the mid-March ECB meeting ECB President, Christine Lagarde confirmed that further rate hikes are likely according to their expectations. Investors have become more cautious in the past few days, with stocks declining moderately in both Europe and the US. Rates markets have been well supported, especially at shorter tenors. In FX, EUR-USD fell below 1.10 after reaching a new YTD peak of 1.1095. Credit spreads have gradually widened across the board after a mixed earnings season. We closed the Saudi and Serbian sovereign positions, switched from the U.S. t-bills to the ones with longer tenor, slightly adjusted exposures to Hungary, Romania, Poland and Turkey along with further decreasing of the Kazakh risk.

GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	The fund has no benchmark
