

## INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The core of the Fund's investments is Central Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), South East Europe (Serbia, Turkey), the Baltics (Latvia, Lithuania) and the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and bonds of majority state-owned companies, in addition to which the Fund holds short-term and long-term Hungarian government securities for diversification and liquidity management purposes. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.

## MARKET SUMMARY

The ECB hiked by 50bp but did not provide any guidance on future moves. The US inflation report flagged strong inflationary pressure for households, while US producer prices signalled easing pressure is coming in. As a result, the Fed increased interest rates by 25bp and signalled it is likely almost done with rate hikes. However, Fed Chair Jerome Powell reiterated that no FOMC participant sees rate cuts this year in their baseline. The BoE, SNB and Norges Bank all raised rates further. The Eurozone composite PMI surprised to the upside, reflecting a strong improvement in services activity while the manufacturing sector remains weak. European banking regulators clarified that shareholders would continue to bear losses before holders of AT1s if crisis intervention is needed. Eurozone inflation for March eased to 6.9%, its lowest level since February 2022, while core inflation edged up to 5.7%. Firming risk sentiment has been a key driver across assets. Sovereign yields were up, with EGBs under stronger selling pressure at the end of the month, especially at the short end of the curve, due to sticky core inflation. EUR-USD rose above 1.09, while the JPY weakened further. Equities were generally up, and implied volatility declined. Corporate and bank credit spreads moved sideways, with some tightening among high-beta names. We added to the Saudi sovereign positions and bought Serbia government papers, slightly adjusted exposures to Hungary, Romania and Poland along with further decreasing of the Kazakh risk; closed short positions in the long-end of the German curve during the month.

## GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	The fund has no benchmark
ISIN code:	HU0000724273
Start:	12/29/2020
Currency:	PLN
Net Asset Value of the whole Fund:	8,231,816 EUR
Net Asset Value of PI series:	PLN
Net Asset Value per unit:	0.646968 PLN
