

VIG Emerging Europe Bond Investment Fund

R series HUF MONTHLY report - 2023 MAY (made on: 05/31/2023)

INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The core of the Fund's investments is Central Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), South East Europe (Serbia, Turkey), the Baltics (Latvia, Lithuania) and the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and bonds of majority state-owned companies, in addition to which the Fund holds short-term and long-term Hungarian government securities for diversification and liquidity management purposes. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.

MARKET SUMMARY

The US suspended the government's debt ceiling through Jan 1st, 2025. Fed Governor Philip Jefferson (who has been nominated to Vice Chair) indicated the FOMC will likely pause at its 13-14 June meeting. In the Eurozone, headline inflation fell sharply, to 6.1% YoY last month, with core CPI down moderately, to 5.3% YoY, amid broad-based disinflation. China official PMIs softened in May as the reopening boost slowed down. EGBs and USTs saw a pronounced rally, while European investment grade corporate credit risk premia moved range bound, although high yield and subordinated debt spreads saw a slight increase in volatility. In FX, the USD was ultimately forced to give back some of its early gains, allowing EUR-USD to recover back to around 1.0750.
