

INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, averagely low-risk form of investment, while providing investors with higher returns over the medium term than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) on behalf of the Hungarian State, and bonds issued by the National Bank of Hungary (MNB). The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated in HUF. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

MARKET SUMMARY

The pace of price increases in Hungary has slowed further in March. Although food price freezes might remain until the end of April, more and more grocery stores are announcing price cuts on a number of food items. The dissipation of inflation according to our view will be a slow process, with a more rapid decline in the pace of price increases likely to start in the summer months. During the month, the deposit rate freeze which was introduced at the end of last year was extended and financial institutions were restricted from accessing the discount bond issued by the Hungarian National Bank. This has once again damaged monetary transmission. At the March rate-setting meeting, the Monetary Council did not change the interest rate conditions, but stressed that maintaining the 18% rate could be justified for some time to come. The forint started to weaken again in the wake of the US bank panic, but in the second half of the month the EURHUF exchange rate was back around 380. Bond yields saw mixed movements during the month, with yields on the 3 and 10-year maturities down by 10 and 19 basis points respectively, while the 5-year maturity ended the month 6 basis points higher. The US bank panic played a leading role during the month, with the market pricing in rate cuts in the US for this year rather than the significant further rate hikes that had been seen previously. As a result, both the global and domestic environment became more supportive, with the effect of which we became more positive on the asset class.

GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
