

VIG Hungarian Money Market Investment Fund

A series HUF MONTHLY report - 2023 MAY (made on: 05/31/2023)

INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, low-risk form of investment, while providing investors with higher returns than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) and bonds issued by the National Bank of Hungary (MNB). The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated primarily in HUF, but also in other currencies. The Fund may also invest to a limited extent in government securities or guaranteed bonds issued by the OECD or a G20 country, or any debt security issued or guaranteed by the central government or a regional or local government or the central bank of any EU Member State, or by the European Union, the European Central Bank or the European Investment Bank. The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. In addition, the remaining time to maturity of each security is a maximum of 2 years and a maximum of 397 days until the nearest interest-rate determination date. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

Aegon Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in Aegon Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in Aegon Moneymarket Fund is capable of fluctuation. Aegon Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

The pace of price increases in Hungary continued to slow in May. The year-on-year inflation rate was 21,5%, below market expectations of 22.3%. Food prices started to stagnate in April and this trend mostly continued in May with a month-on-month increase of 0.1%. At the May rate decision meeting, as expected, the Monetary Council began to normalize interest rates, with a first step of cutting the effective rate by 100 basis points, cutting the ON deposit rate to 17%. This also lowered the upper end of the interest rate corridor, with the ON rate now standing at 19.5%. With monthly cuts of 100 basis points, the base rate and the ON deposit rate could thus converge in September, after which the base rate is expected to remain at 13%. With the start of the rate cuts, demand in the 12-month T-bill auctions increased, with the first issue of T-bill 75 billion and the second issue of T-bill 60 billion instead of the planned 15 billion. As a result, the average yields on the auctions also fell from 14.4% to 13.5%. The average yields on the 3 and 6-month T-bill auctions also fell, with the average yields on both maturities falling below 13.7% by the end of May. The Fund continued to gradually increase its interest rate risk as inflation slowed.
