

INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, low-risk form of investment, while providing investors with higher returns than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) and bonds issued by the National Bank of Hungary (MNB). The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated primarily in HUF, but also in other currencies. The Fund may also invest to a limited extent in government securities or guaranteed bonds issued by the OECD or a G20 country, or any debt security issued or guaranteed by the central government or a regional or local government or the central bank of any EU Member State, or by the European Union, the European Central Bank or the European Investment Bank. The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. In addition, the remaining time to maturity of each security is a maximum of 2 years and a maximum of 397 days until the nearest interest-rate determination date. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

Aegon Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in Aegon Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in Aegon Moneymarket Fund is capable of fluctuation. Aegon Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

The pace of price increases in Hungary continued to slow in April. Year-on-year inflation came in at 24%, which was a positive surprise for the market. In April, the government took further measures to curb inflation. The food price freeze, previously in place until the end of April, was extended until the end of June, and it was announced that a compulsory promotion in grocery stores for certain basic food groups will be introduced from 1 July. It remains to be seen whether the intervention in food prices has lived up to expectations, but it is clear that we have the highest food price inflation compared to our neighboring countries. At the April rate-setting meeting, the Monetary Council left the base rate unchanged, but lowered the upper limit of the interest rate corridor from 25% to 20.5%. In doing so, they indicated that the rate cut could start soon and that they will decide on the evolution of the effective interest rate depending on the risk perception. Demand in T-bill auctions increased during the month. Following the news of the rate cut, the 3-, 6- and 12-month auctions sold at lower average yields. By the end of the month, the 3-month T-bill yield had fallen to 14.7%, the 6-month T-bill yield to 14.71% and the annual T-bill yield to 14.4%. Interest rate risk in the fund continued to gradually increase during the month as inflation slowed.

GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	100% ZMAX Index
ISIN code:	HU0000718135
Start:	12/01/2016
Currency:	HUF
