

VIG MoneyMaxx Emerging Market Total Return Investment Fund

A series HUF MONTHLY report - 2023 MAY (made on: 05/31/2023)

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to create an investment portfolio through asset allocation between and within asset classes that achieves annualised capital growth for investors higher than the benchmark over a 3-year time horizon. The Fund seeks investment opportunities primarily in emerging markets. In order to realise the investment objectives, the asset groups in the Fund's portfolio may be freely varied without having to adhere to any predetermined risk profile. The Fund is a "total return" fund, which can invest in several asset classes, i.e. instead of focusing on just one sub-sector of the money or capital market, it concentrates its investments within a combination of assets that promises the highest possible return at any given time. The Fund does not aim to track a fixed benchmark, nor does it adhere to a fixed equity-to-bond portfolio ratio, but seeks to vary this ratio within broad boundaries, with the composition of the portfolio changing dynamically in order to achieve the Fund's return target. The Fund's investments focus on emerging markets. The Fund primarily allocates its assets between emerging-market local currency government securities, hard currency government and corporate bonds, and equity markets, in accordance with the latest market expectations. The Fund may thus assume interest rate risk, currency risk, credit risk, as well as equity market risk. The Fund may take positions in other regions and markets (e.g. commodity markets) besides the emerging markets. The Fund hedges most of its currency positions, but it may also take open currency positions. In the interest of efficient portfolio design, the Fund may also assume forward and futures positions.

MARKET SUMMARY

As expected, the US fiscal crisis was resolved by the end of May. To an outsider, it was odd that such a thing could happen again after 2011, when everyone knew full well that the US would not declare bankruptcy. If it did, it would have unforeseen consequences that no one would dare risk.

The Fed raised the base rate by 25 basis points to 5.25%. The wording of the Fed's statement at the post-raise briefing was much the same as that used at the top of the rate hike cycle in 2006, deleting the phrase "FOMC expects further rate hikes to be necessary", but there was no mention of the possibility of easing, and the balance could still tip towards tightening.

In Hungary, although falling, inflation is still very high. According to the official KSH release, inflation was 24% in May, more than 1% lower than the previous month. What was different from previous months was that the National Bank lowered the top of the interest rate band from 25% to 19.50%. While the official base rate is 13% and the overnight 1-day rate is 17%, the lowering of the top of the band itself could be a guide for the months ahead. The MNB president said at the post-cut briefing that if inflation numbers continue to fall, a 100 basis point per month rate cut could be expected. The forint did not weaken much on the announcement, indicating that the market had already priced in the news. Let's not forget that foreign investors still have access to the MNB's 17% weekly deposit, which makes the forint very attractive. Let us also note that the forint yield is still significantly high compared to the surrounding countries.

The Fund achieved a positive return in May. On the bond side, we increased our weighting in foreign bonds by buying short-dated Romanian and French euro-denominated bonds. We also bought long-dated US and UK government bonds. This increased the interest rate risk from 3.2 years to 3.8 years. On the FX side, we continue to hold a 10% long forint position against the euro. On the equity side, the fund remains underweight. On the commodity side, we keep the short gold position unchanged.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Hurdle rate, annual 9.5%
